APPLICATION

Concrete surfaces must be in sound condition and properly prepared prior to any KEY RESIN COMPANY flooring system installation. Refer to Key Resin Company Technical **Bulletin #1** for specific preparation guidelines.

KEY THIN-FILM COATING SYSTEMS are installed three steps including priming, spreading base and finish coats with a trowel or squeegee to the desired thickness TECHNICAL SERVICE back-rolling with a medium or short nap roller. For specific installation guidelines, consult Key Resin Company's Installation Instruction Manual.

MAINTENANCE

After completing the application of a KEY THIN-FILM COATING SYSTEM, the installer should provide the owner with maintenance instructions. If floors become slippery due to animal fats, oil, grease, or soap film, clean and rinse thoroughly.

KEY THIN-FILM COATING SYSTEMS are easily cleaned with neutral soaps or detergents. Routine mechanical scrubbing is recommended for all surfaces having a non-skid texture. Waxing is optional. Long periods of heavy traffic may cause wear patterns necessitating a maintenance application of a finish coat.

COMPOSITION

KEY THIN-FILM COATING SYSTEMS are composed of epoxy primers with a wide selection of base and finish coats available to meet various exposure and performance requirements.

COLOR & AVAILABILITY

KEY THIN-FILM COATING SYSTEMS are available in a variety of standard colors. Custom colors are available subject to laboratory approvals, minimum quantities, lead time for production and increased cost. Colors will not fade or wear thin.

Key Flooring Systems are available throughout the United States, Canada, and a number of other countries. Contact the KEY REPRESENTATIVE in your area for details.
