

New Pilkington **Optifloat™** Opal

PILKINGTON

Introducing Pilkington **Optifloat™** Opal. The new translucent glass that's easier to handle.

While they can look stunning and create a beautiful effect, many of the semi-opaque glasses on the market have proved difficult to stock, handle and process – until now.

Pilkington **Optifloat™** Opal offers all the diffused natural light of a translucent glass, but with none of the drawbacks. An acid-etched product suitable for internal or external use, it creates an attractive finish for windows, partition walls, glass doors, furniture, shelving, wall cladding and many more applications.

But the real beauty is that it can be stored and processed in the same way as standard float glass, is readily available from stock in a range of sizes and thicknesses and can be easily tempered, laminated or screen-printed – making Pilkington **Optifloat™** Opal the ideal choice.

Features:

- Acid etched glass
- High light transmittance
- Diffuses light to give a uniform natural look
- “Velvet smooth” and durable surface
- Can be used internally and externally
- Etched surface as anti-reflective

Benefits:

For consumers:

- High perceived value in any application
- Creates excellent privacy while allowing light to enter the space
- Weather-resistant

For processors:

- Available from stock
- Can be stored and processed as ordinary float glass
- Easily tempered, laminated and screen-printed
- Available from 3 to 12mm thicknesses
- Stock size 142”x 87” (360x220 cm)
- Typical light transmittance of 87% (4mm)

Applications:

- Windows
- Partition walls
- Glass doors
- Glass furniture
- Doors
- Shelves and cabinets
- Display cases
- Working surfaces
- Wall cladding
- Balustrades
