Why You Should Choose Folding Guard Partition Systems

For over 40 years Folding Guard Corporation of Chicago, IL, has been creating innovative safety and security products. In addition to our heavy–duty storage systems, we manufacture partitioning systems recognized for their exceptional quality, durability and value.

To meet your needs and budget, we offer three types of partitioning systems: Qwik-Fence,® Saf-T-Fence™ and Wov–N–Wire™. The wide array of options and accessories available ensures that your partitioning system will perfectly meet your needs.

We use high quality material in all of our products, and operate under rigorous manufacturing and engineering standards. Each partitioning system is backed by the best warranty in the business.

We offer free layout assistance, and have a nationwide network of Folding Guard Dealers that provide sales, service and installation.

100% QUALITY GUARANTEE
5YR. Warranty

QWIK-FENCE® PARTITIONS

Durable, attractive and easily installed in any space, Qwik-Fence is also our most economical partitioning system. Installs in 25% less time than conventional systems.

Construction Details - Our patented process secures thick 8 gauge galvanized wire in a rectangular pattern that is securely welded at each intersection. Posts, panels and doors are all-steel and completely galvanized.

Modular - Component system makes planning and installing easy in any space. Qwik-Fence can be trimmed in the field to accommodate changes or space irregularities. Stackable to a height of 45'. Easily relocated.

Maintenance-Free - The galvanized finish is rust-inhibitive and corrosion resistant. The bright steel finish gives Qwik-Fence a clean, attractive look. Colors available.

OPTIONS

• Roof	• Electric strike/card reader lock
• Service window	• Interlock switches
• Keyed alike cylinder lock	• Crash/panic bars
• Double cylinder lock	• Automatic closures
• ADA-compliant lock	• DEA systems
• Push button lock	• Colocation systems

PRE-DESIGNED ROOM KITS:

Qwik-Fence 2-, 3- and 4-sided room kits are economical and easily installed. Includes a sliding door with cylinder lock or padlock hasp, and all hardware. Sizes range from 8' x 8' to 16' x 16'. Options include: roof, service window.

NEW

SAF-T-FENCE™ PARTITIONS

Saf-T-Fence partitioning provides an extra measure of structural strength and smaller mesh openings for increased security.

Construction Details - Panels are built on a tough 1-1/2″, 14 gauge carbon steel frame. The 8 gauge wire mesh is securely welded at each intersection creating 1-1/2″ square openings. The heavy-duty steel frames and tight mesh of welded wire provide extra security and structural integrity.

Modular - Component system makes planning and installing easy in any space. Easily relocated should needs change. Stackable to a height of 45′.

Maintenance-Free - Saf-T-Fence posts are galvanized; other components have one coat of durable grey gloss enamel. Colors available.

OPTIONS
- Roof
- Service window
- Keyed alike cylinder lock
- Double cylinder lock
- ADA-compliant lock
- Push button lock
- Electric strike/card reader lock
- Interlock switches
- Crash/panic bars
- Automatic closures
- DEA systems
- Colocation systems

PRE-DESIGNED ROOM KITS:

Saf-T-Fence 2-, 3- and 4-sided room kits are economical and easily installed. Includes a sliding door with cylinder lock or padlock hasp, and all hardware. Sizes range from 8′ x 8′ to 16′ x 16′. Options include: roof, service window.

WOV-N-WIRE™ PARTITIONS

Wov-N-Wire partitions are the traditional enclosure system specified by architects and contractors. The tough steel wire is woven to create a durable, high-quality system.

Construction Details - 10 gauge steel wire, woven into an extremely strong 1-1/2″ diamond mesh. Frames, posts and components are all steel.

Modular - Component system makes it easy to design a partition of any size, up to 25′ in height. Components bolt together quickly. Easily relocated.

Maintenance-Free - Standard gray enamel finish is tough and maintenance-free. Colors available.

OPTIONS
- Roof
- Service window
- Keyed alike cylinder lock
- Double cylinder lock
- ADA-compliant lock
- Push button lock
- Electric strike/card reader lock
- Interlock switches
- Crash/panic bars
- Automatic closures
- DEA systems
- Colocation systems

PRE-DESIGNED ROOM KITS:

Wov-N-Wire 2-, 3- and 4-sided room kits are economical and easily installed. Includes a sliding door with cylinder lock and all hardware. Sizes range from 10′ x 10′ to 30′ x 20′. Options include: roof, service window.
