

# Guardian 2000 Security Mesh Fence System

## THE ORIGINAL MODULAR SECURITY FENCE

The Guardian Fence System® by Payne is the first system to provide a total security solution, from easy installation to complete integration. The innovative modular design, constructed with high-strength security mesh, makes this system ideal for medium security projects.

### *Recommended for:*

- Commercial Buildings
- Retail Facilities
- Partitioning
- Office Buildings
- Sports Facilities
- Industrial Facilities
- Government Buildings

## BENEFITS

### **Anti-Cut & Anti-Climb**

The Guardian Fence System® protects against both cutting and climbing, with heavy gauge mesh and small mesh openings that resist common cutting tools and hand or foot holds.

### **Modular Design**

The modular design of the Guardian system allows for easy and affordable installation, upgrade, repair and maintenance.

### **Security Integration**

Security component cabling such as intrusion detection, surveillance and access control are easily integrated – and hidden – within protective steel rails.

### **Long Service Life**

High quality galvanized steel and aluminum components provide for a long service life. The Guardian system is also available with a super-durable, Architectural Grade Powder Coating.

U.S. Patent No. 7,628,386. Additional U.S. and International Patents Pending.

## The Original Complete Security Mesh System

### Panels

High strength security mesh panels create an effective anti-cut, anti-climb barrier. The Guardian 2000 model is offered standard with SentryGuard 34-9 mesh, and a wide range of additional mesh options are available.

### Guardian Unions

Extruded aluminum Guardian Unions, with panels brackets, secure the security mesh panels to horizontal rails within the Guardian Fence System®. The GU-CP Guardian Union features a cover plate, keeping installation fixtures from view.

### Posts and Rails

Panels are affixed to steels rails, which are attached to the steel posts. This modular configuration allows for fast installation – and that means that exact post spacings are not a requirement!

### Gates

Choose from a wide range of gate styles, including pedestrian and drive Swing gates, as well as Slide and Cantilever gates.

### Coating

Guardian system panels and gates are standard with a superior galvanization, and are available with Betafence USA's exclusive Super-Durable powder coating. This coating provides longer protection from U.V. rays and salt spray than either E-Coat or standard polyester coatings.

Standard Options	
Height	8'
Security Mesh	SentryGuard 34-9
Guardian Union	GU A-CP
Rails	
Galvanized Finish	2" Round
Powder-Coated	2" TS
Posts	
Galvanized Finish	3" Round
Powder-Coated	3" TS

### Warranty

The Guardian Fence System® by Payne is backed by a 10-Year Manufacturer's Warranty, giving you the peace of mind that the world's leading producer of fencing stands behind this product.

## Guardian 2000 Standard Mesh Options

Expanded

Welded Wire

LouverMesh

Description	Name	Size	Screening %	% Open Area	Thickness		Lbs. per 100 S.F.		Short Opening Size	Long Opening Size
