ORNAMENTAL FENCE

Payne Makes Ornamental EZ

The patent-pending **EZ-UP Fence System** has proven to be the fastest and most cost-effective Ornamental fence solution in the industry.

Perfectly suited for projects with irregular or inexact post settings, the unique rail support of this system provides for the most versatile ornamental fence system available for commercial and industrial applications.

Because of its patent pending design, the EZ-UP system installs in as little as half the time of conventional systems that are set between columns.

Panel heights can be constructed as high as 24 feet, and are available with unique Scalloped and Arched-Top designs.

And for projects requiring gates, the innovative Gate Jamb design of the **EZ-UP** system makes installation even easier – and faster!

For High Security applications, the **EZ-UP** system integrates seamlessly with **Payne Fence Products'** patent pending **Rhino Anti-Ram Barrier**.

QUIKVIEW

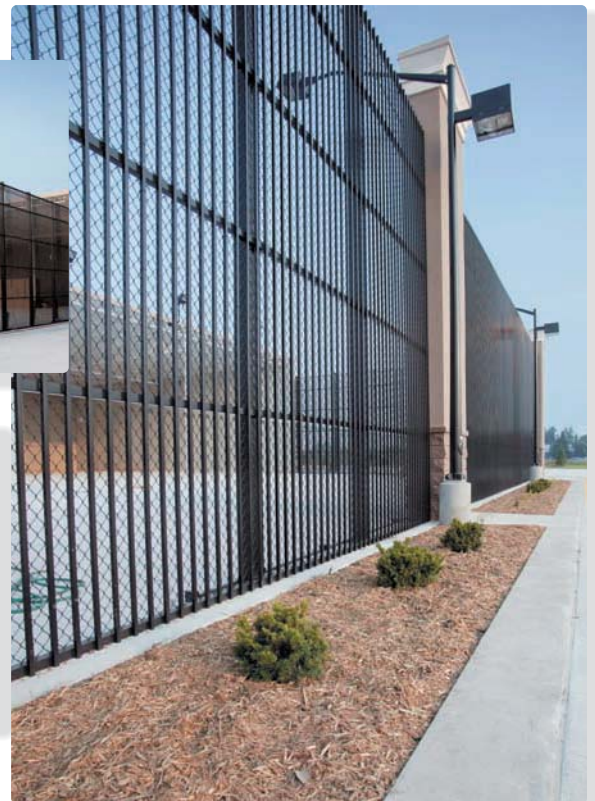

Primary Applications

- Box Store – Garden Center
- Commercial Facilities
- Industrial Facilities

Key Benefits

- Installs Fast, Saving Time and Money
- Panel Heights Up To 24 Feet Means No Stacking
- Easily Installed With Irregular Post Settings

The Original Modular Mesh Fence System

The **Guardian Fence System** by Payne provides you a revolutionary approach to meet security fence project requirements with a more affordable and attractive solution.

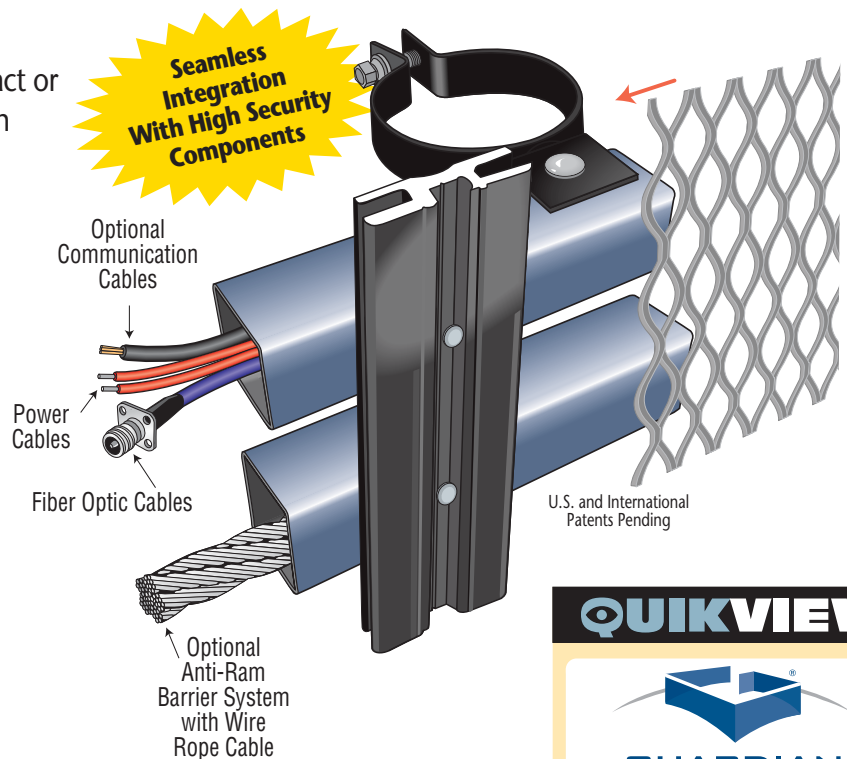

The secret to the **Guardian System** is a patent-pending development of an Interlocking Modular Fence System that allows you to choose from the industry's widest available variety of rigid metal meshes to construct the fence.

The **Guardian Fence System** can be installed more quickly and at less expense than other fence alternatives.

As an added benefit, existing fences with inexact or irregular post settings – such as chain link – can be easily and affordably retrofitted.

The result is an attractive, and highly secure, barrier that:

- **Installs Quickly**
- **Can Be Easily Modified**
- **Requires Less Maintenance**
- **Remains Strong For Many Years**
- **Is Easily Integrated With Security Components**
 - Tamper Detection
 - Cables and Fiber Optics
 - Vehicular Anti-Ram
 - Barbed Tape

QUICKVIEW

Primary Applications

- Retail and Commercial Facilities
- Partitions
- Security Perimeters

Key Benefits

- Installs Fast, Saving Time and Money
- Easily Installed With Irregular Post Settings
- Resists Cutting and Climbing

Perimeter Security Barriers

Payne Has Opened The Way To Faster – And Easier – Gate Installations

Payne Fence Products has designed a patent-pending gate jamb system that installs faster and easier than any other gate available.

Side panels mount directly to the transom panels, and are easily adjusted for height, saving time and manhours, as openings are created perfectly to size – ideal for applications with inexact or irregular post settings.

Plus, the unique mounting system for the swing gate does not require any welding of hinges, preventing damage to the finish.

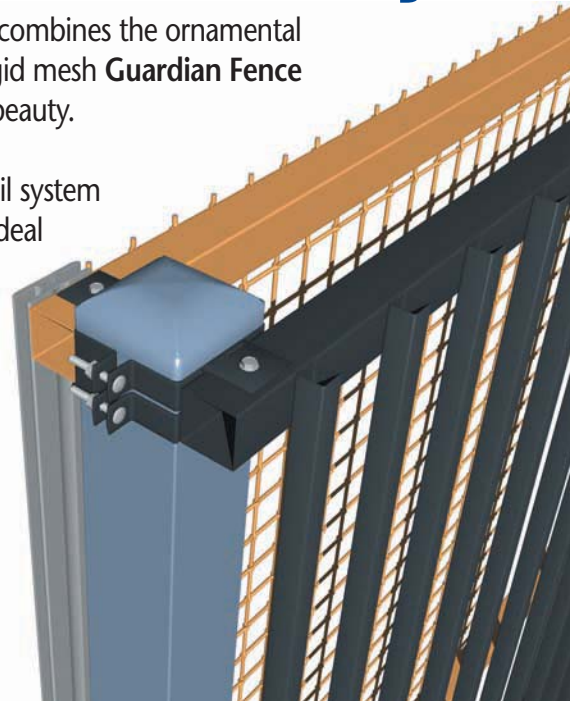

Ornamental – With Extra Security

The **GS-3** Fence System by **Payne Fence Products** combines the ornamental **EZ-UP Fence System** with the patent-pending, rigid mesh **Guardian Fence System** for an unparalleled barrier of strength and beauty.

The fast-installing **GS-3** system employs a unique rail system allowing dual materials on either side of the posts, ideal for projects with irregular or inexact post settings.

With more than 40 rigid mesh styles available with the **Guardian system**, choose varying degrees of visual screening, and anti-cut, anti-climb properties.

QUICKVIEW

GS-3
Patent Pending BY PAYNE

Primary Applications

- Box Store – Garden Center
- Commercial Facilities
- Industrial Facilities

Key Benefits

- Rigid Metal Mesh Deters Pass-Through and Cutting
- Installs Fast, Saving Time and Money
- Easily Installed With Irregular Post Settings

UpGrade Your Next Project

The all-new UpGrade by Payne Fence Products provides you a rackable ornamental solution that provides the cost-effectiveness your customers demand, without sacrificing the high quality you expect.

UpGrade's superior steel and aluminum tubing makes it stronger than competitive panels, and you can order this fence with Payne's Super-Durable powder coating – the best in the industry!

Available in heights from 4 to 12 feet, and in panels up to 8 feet in length, UpGrade is ideal for commercial and industrial projects – especially where there are contours in the landscape. You can also choose from single or double-top rails.

QUICKVIEW

Primary Applications

- Commercial Property
- Industrial Facilities
- Public Projects – Parks, Municipal Buildings

Key Benefits

- High Degree Of Racking To Match Landscape Contours
- High Strength Tubing Assures Long Service Life
- Available in both Steel (OS) and Aluminum (OA)

PARKING GARAGE SCREENING

QUICKVIEW

PARKADE
SCREENING SYSTEM
Patent Pending BY PAYNE

Primary Applications

- Parking Garage Screening

Key Benefits

- Rigid Metal Mesh Deters Pass-Through and Cutting
- Installs Fast, Saving Time and Money
- Wide Range of Design Options and Styles

Secure Screening System

The **Parkade Screening System**, by **Payne Fence Products**, was developed specifically for parking garage structures, providing a unique combination of architectural appeal and structural security.

The unique patent-pending design of **Parkade** allows you to choose from a vast array of rigid metal mesh materials for the screening system, presenting a wide range of styles for physical security and visual screening.

Choose from the more than 40 rigid mesh materials offered by **Payne Fence Products** providing a wide range of application benefits, including:

- Visual Screening
- Wind Screening
- Anti-Cut Protection
- Anti-Climb Protection

Custom mesh designs are available. Please call us for assistance in choosing the best mesh for your project.

- High Strength Tubing Assures Long Service Life
- Unique CAM Process Provides One-Of-A-Kind Panels

Because Your Project Is Unique

At **Payne Fence Products**, we understand that many ornamental fence projects have unique aspects and challenges.

As a result, Payne has redefined the notion of “custom” ornamental fencing, with our approach to consultative customer service and design that has resulted in award winning fence projects.

Because Payne offers custom design and engineering for your fence project, you are assured of a solution made to fit your specific requirements, rather than an “off-the-shelf” product that forces you to adjust your design.

PAYNE
FENCE PRODUCTS

Architectural Grade Powder Coating For Years of Performance and Beauty

Fencing and gates manufactured by **Payne Fence Products** feature a unique Architectural Grade Powder Coat. This coating, used exclusively by **Payne Fence Products**, is super-durable, environmentally sound, plus provides the industry's Highest Weatherability and Gloss Retention.

This Powder Coating process will assure you and your client of a fence or gate that will retain its beauty and structural integrity for many years, with a minimum of upkeep or maintenance.

Custom Colors are also available.
Please contact us for details and pricing.

Protecting The Environment While Securing Your World

Payne Fence Products is a leading innovator in the design and manufacture of Security and Architectural Metal Fencing, and we take seriously our responsibility of providing the highest performance, quality and value.

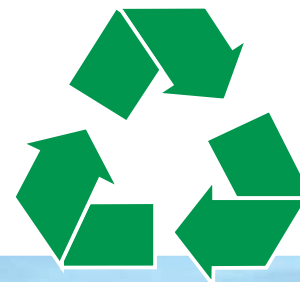

Just as important is **Payne Fence Products'** commitment to providing fence solutions that are manufactured with respect for our environment, utilizing:

- **Recycled Raw Material**
- **Non-Toxic Material**
- **Processes Free From Air Pollutants**

Payne steel fence products are manufactured using recycled steel material.

The Architectural Grade Powder Coating available on Payne fence products is **free of volatile organic compounds and hazardous air pollutants**. The unique design of this powder coating material allows it to be **applied and cured in a process requiring 20% less energy** than standard powder coating products.

Plus, Payne powder coating pre-treatments are 100% free from heavy metal elements, including zinc and chrome, common to many other powder-coated fence products.

Solutions

At Payne, we are here to provide you with more than great products. Our solutions-based approach guarantees you the best product design for each project, resulting in the optimum balance of value in all applications.

We assure you a personal approach to providing you and your project the specific attention to detail that has set **Payne Fence Products** apart from the mass distributors in the fencing industry.

Payne Fence Products Delivers Quality

From coast-to-coast and around the globe, you can count on the quality and performance of **Payne Fence Products**.

Because you are ordering direct from our manufacturing and distribution facility in Texas, we are able to deliver your order on time, anywhere in the U.S. and throughout the world. And, you are assured of the highest quality American made product available.
