

**Depend on Hope's for strong durable, custom designed exterior detention windows and exterior non-secure windows and doors.**

## The Turnkey Solution

### Hope's® Detention Windows

The world's premier manufacturer of steel windows and doors is also the leading manufacturer of operable and fixed steel and stainless steel detention windows. Hope's offers a full range of options for custom designed exterior detention windows, from maximum to minimum security, as well as non-secure windows and doors, blast resistant windows and 60, 90 and 120-minute fire rated wall systems. We produce and ship to meet tight deadlines, and we provide project support at any time during the design and construction process.

### Superior Strength

Hope's detention windows are rigorously tested in-house and by independent laboratories. Certified reports guarantee full compliance with the most stringent ASTM standards. Our standard, fully-welded frame construction leads the way in achieving the increased requirement of 1800 blows for the ASTM F1592 impact test. The superior strength of our fully-welded construction provide product compliance with ASTM E283 (Air Infiltration Test) and ASTM E331 (Water Penetration Test).
