

GEARBOSS® AIRPRO™ LOCKERS

OPEN CONFIGURATION WITH BACKER BOARD
AND FOOTBALL TOPPER OPTIONS
Germantown HS, Germantown, WI

Introducing the new concept in team room lockers from GearBoss.

Our AirPro™ lockers are a big part of creating a team room that stands apart. A room that gets away from the commercial look of sheet metal solutions. A room that is infinitely easier to clean, more sanitary and faster drying. A team room that carries a high-end aesthetic reflecting your pride and traditions. A team room that saves on floor space, with integrated benches that open up your rooms and provide for more effective traffic flow, team meetings and player interactions.

Sheet metal hallway lockers and traditional gym lockers simply can't match these features or create a team room environment where varsity traditions are in a class of their own.

WOOD DOOR, OPEN AND GRILLE DOOR CONFIGURATIONS

GEARBOSS® AIRPRO™ LOCKERS

GearBoss® AirPro™ lockers give you the options to tailor the solution to your program.

Each AirPro locker comes with an adjustable height shelf with 3 apparel hooks, integrated hinged bench seat and footlocker. The seat can be locked over the footlocker for secure storage. You may add an optional strongbox inside the footlocker for another level of secure storage. The locker area can be kept open or you can add a grille or laminate door. There are many optional wood grains and laminate colors to choose from for these door panels. Choose colors that reflect your team traditions and for your football programs, add an optional shoulder pad and helmet topper (shown on front side).

Design features

- Proven durability. The design is based on the construction of a specialty product proven by thousands of military and fire station installations.

Steel Tube Locker Frame: 1-1/4-inch (31.75 mm) OD, 16-gauge steel tube, with fully-welded corner joints.

Steel Grid Infill: 3 inch (76 mm) square pattern, 0.25-inch (6.3-mm) diameter welded steel wire grid, welded to steel tube frame.

Grill Door: steel grid infill, 1-inch square pattern 0.16-inch (4.1-mm) diameter wire in 1-1/4-inch (31.7 mm) OD, 16-gauge tube steel frame, with replaceable split pin hinge and locking hasp for padlock by owner.

- Antimicrobial powdercoat and laminated finishes in a variety of colors.
- Widths 15" (38cm), 18" (46cm), 24" (61cm), 30" (76cm)
- Open grid promotes airflow, debris drop-through and visual inspections of contents. Adjustable height shelf with 3 apparel hooks.
- Mounts to wall 6-8" (15 - 20cm) off floor and supported by legs every 4th-5th locker, allowing for sweeping, mopping and sanitization (bleaching) under lockers. Island configurations mount to floor on legs.
- Integrated seat eliminates floor-mounted benches or folding chairs, saving critical square feet of room space.
- All units feature a hinged seat over the footlocker. You can add an optional strongbox inside the footlocker for another level of secure storage.
- Optional grille or wood laminate doors lock the entire locker space with one padlock. Solid laminate closure options are available in a variety of looks from wood-grain tone to solid colors.
