Company Overview

M-Boss Inc. is the premier manufacturer of decorative metal surfaces for the design community. Products include: Tin Ceilings, Cornice, Moldings and Medallions. Patterns range from sleek contemporary styles and customized designs such as company logos and special themes to traditional designs replicated from turn-of-the-century originals. M-Boss Inc. products provide a unique and timeless surface that enhances the overall design of space and creates a spectacular fifth wall. With hundreds of patterns and more than 75 finishes, no other company provides designers, architects and builders such variety and design flexibility.

PRODUCTS

Embossed Ceiling Panels

M-Boss Inc metal panels are available in hundreds of embossed patterns in three substrates (aluminum, solid copper, and tin-plated steel) providing price and design flexibility to fit any budget. Aluminum is the preferred metal because of its superior performance: won't rust, perfect for high humidity environments; lightweight for economical shipping and easier handling; requires only standard tin snips to cut and trim. All M-Boss Inc. patterns are available in 75 dazzling finishes. M-Boss Inc. panels are 2' x 2' for nail-up and lay-in applications and are easily installed by one person. Products are shipped directly to job sites, promptly, correctly and completely.

Cornice and Moldings

Embossed metal cornice and moldings by M-Boss Inc. are a perfect complement to any decorative ceiling or are stunning when used alone. Most cornice and moldings are available in lengths that provide 48" in nominal coverage. Cornice are available in widths ranging from 2.5" to 24". Moldings are available for chair rail, baseboard and toe kick applications ranging in width from 3" to 24". Often, metal cornice and moldings are used to harmonize with room and/or cabinet hardware, or stainless steel appliances.

Backsplashes

Create a stunning backsplash without the hassle and expense of ceramics and grout! M-Boss Inc. backsplash panels are an industry exclusive and specially sized (18" x 24") for most backsplash areas, eliminating excessive trimming and scrap. M-Boss Inc. backsplash panels are available in any 3- and 6-inch repeating patterns and in any one of the 75 M-Boss Inc. finishes as well as Solid Copper. Standard tin snips can be used to easily cut around cabinets and outlets. It's so easy, it can be installed in just a few hours without special cutting tools and messy grout; and, your installer won't have to return to the job site to apply and cure grout. It's the lowest cost metal backsplash on the market!

Medallions

M-Boss Inc. medallions are easy to install and add elegance to the area above chandeliers, ceiling fixtures and ceiling fans. Use a resin medallion by itself or a pressed metal medallion as an accent with a complete tin ceiling. Styles range from simple circular patterns to extremely ornate designs, in individual sizes from 12" to 19" and in panels from 2' x 2' to 4' x 4': all in a variety of finishes. Pressed metal medallions are available in aluminum, solid copper or tin-plated steel, in two application types: nail-up to a wood substrate or lay-in to a suspension grid. Individual resin medallions are pre-primed and ready to be painted or stained in the field. Resin medallions are easily installed using a standard panel adhesive or brad gun. New sizes are being added frequently, so check www.mbossinc.com often.

Foam Coffers with Inserts

The stately elegance of coffered ceilings is now easy to duplicate using any standard grid system. M-Boss Inc. coffered ceilings are lightweight and customizable using three types of inserts: pressed metal, resin, or opaque acrylic. Molded resin coffers have all the benefits of wood, with none of the hassles: Will not crack, split or rot; cuts like wood; and can be painted or stained. M-Boss Inc. coffers provide additional acoustical sound absorption and can be customized with pressed metal inserts in a selection of over 200 patterns and over 75 finishes. Perfect for any library, office or business. Complete the elegant look with matching or complementary M-Boss Inc. Grid Sleeves to reface an existing or new grid.

PRESSED METAL TECHNICAL INFORMATION*

DESIGN FLEXIBILITY: A vast selection of patterns and finishes from M-Boss Inc. allows you to create unlimited design possibilities. Patterns range from elaborate and ornate to sleek and contemporary. M-Boss Inc. has over 75 different finishes to perfectly coordinate with any color palette; or M-Boss Inc. can usually color-match to any commercial-grade, professional brand of paint.

CUSTOMIZATION: Proprietary manufacturing processes and state-of-the-art equipment allow M-Boss Inc. to provide cost effective custom replication and graphics. M-Boss Inc. specializes in replicating original patterns: providing authentic replacements or historically accurate new tin ceilings to the restoration, renovation, and historically styled, new construction marketplace. This process can be used to replace an entire ceiling or just some damaged panels. M-Boss Inc. also can customize any pattern to your specifications including company logos, family crests and special novelty themes. A design staff is available to help make any custom design or graphic a reality.

MATERIAL: M-Boss Inc. ceiling panels are made of three substrates: aluminum, solid copper and tin-plated steel. All panels are manufactured using a proprietary process that yields a unique high-quality product. Aluminum is the preferred substrate because of its superior performance: won't rust, perfect for high humidity environments; lightweight, for economical shipping and easier handling; requires only standard tin snips to cut and trim.

INSTALLATION: M-Boss Inc. panels are perfect for single-person installations. Panels can be ordered for nail-up to a wood substrate or as a lay-in to any standard suspension grid system. For either method, the 2' x 2' panels are installed in a few simple steps. The preferred wood substrate for nail-up applications is 3/8" plywood. Lay-in panels will drop into any standard commercial, 15/16" or 9/16" T-Bar suspension grid, consisting of a pre-punched roll-formed steel with exposed flange surface. Main runners and cross runners shall be installed to form 2' x 2' square openings. The grid shall be hung flat and level, suspended by 12-gauge pre-straightened steel wire @ 4' O.C. It is recommended that installers wear cotton gloves (particularly with solid copper and tin-plated panels) in order to prevent depositing oils on the panels and to provide safety from sharp edges during installation.

PANEL SPECIFICATIONS: Three part specs are available on-line through the Sweet's web site or at www.mbossinc.com. M-Boss Inc. panels are available as a nominal nail-up size of 24-3/8" x 24-3/8" or as a nominal lay-in size of 23-7/8" x 23-7/8".

Aluminum panels are 0.016" thick and weigh 0.95 pounds per panel. Copper panels are 0.016" thick and weigh 3.95 pounds per panel. Tin-plated steel panels are 0.010" thick and weigh 1.7 pounds per panel.

FIRE RATING: M-Boss Inc. test results and fire ratings are as follows:

- Mill: 0.0/1.3 Class A
- Clear: 0.0/6.4 Class A
- Color: 0.0/6.0 Class A

Products have been tested by UL with a Class A Rating, and has a flame-spread rating of 25 or less and a smoke density developed rating of 450 or less. Certified by Underwriters Laboratories Inc. 12/15/2004. Determined by ASTM E 84 (UL 723) Standard Test Method for Surface Burning Characteristics of Building Materials.

PATTERNS AND FINISHES: M-Boss Inc. has over 200 panels, more than any single competitor. In addition, custom designs, including replication of an existing panel, are available upon request. All panels, cornice and molding are available in 75 finishes. In addition, an unlimited number of powder coat custom colors are available and M-Boss Inc. can generally color-match any commercial grade professional paint. Call M-Boss Inc. to inquire about a custom color.

QUALITY CONTROL: M-Boss Inc. uses a production process that allows 100% of the ceiling panels to be inspected during the manufacturing of the panels.

PACKAGING AND SHIPPING: Products are economically and promptly shipped direct to job sites. Orders usually ship within one week. Rush service is available. All panels are packed in corrugated cardboard boxes. There are up to 30 pieces per box, depending upon design. Boxes are a nominal 28" and shipped via Federal Express, DHL, UPS or USPS. Orders over 200 pieces are packaged on 30" x 30" skids and shipped via truck/freight. Please contact M-Boss Inc. for information regarding RUSH services.

CUSTOMER SERVICE: M-Boss Inc. provides superior technical support and has the ability to respond quickly to all-sized orders. Our customer service department can be reached through the M-Boss Inc. web site (www.mbossinc.com), by email at: sweets@mbossinc.com or by calling the SWEET'S HOTLINE:
