Introduction

Headquartered in Baltimore, Maryland, Williams Scotsman, Inc. is a national company that provides mobile space, with local expertise, through a network of 86 offices across North America. The company has been a leader in the business for more than 50 years, committed to serving customers in the Construction, Commercial, Education, Healthcare and Government markets. Williams Scotsman provides such temporary and relocatable space as in-plant offices, field

offices, toilet trailers, shower lockers, storage containers, field labs, classrooms, guard houses, and sales centers.

Williams Scotsman can also solve your permanent needs with a multi-sectional or modular building. With over 100,000 units in stock, your space can be delivered and installed on time, meeting very tight schedules. All Williams Scotsman mobile space can be configured to meet

national and state building, electrical, mechanical, and plumbing codes, and it arrives clean and ready for use.

Financing is simple with a variety of lease or purchase options. In addition, our space is protected by a full-maintenance lease or purchase warranty, with fast response to any problem from our local service crews.

Multi-Sectional Buildings

“ The building, itself, has been a wonderful facility. Although modular in construction, the outside has been worked to blend in with the area’s historic look. Best of all, the building has been well accepted by the local populace. ”

~ Dr. James Garrett,
*Point Arena Dental Center,
California*

For an attractive working environment inside and out, Williams Scotsman's multi-sectional buildings give you unlimited options. Available as standard or custom units with a variety of interior and exterior finishes, multi-sectional buildings are a versatile solution for any space need and are relocatable and expandable as your needs change. Flexible buildings for any application from a simple sales office to classroom buildings and complete healthcare facilities. Convenient financing options are available to meet your requirements.
