

# Fiberfence®

Fiberfence: This is the last fence you will ever buy!

- Fiberfence® Ornamental with Button Top Spear
- Firestation No. 38, Fort Worth, Texas
- Maintenance Free Fiberglass Fencing System
- Easy Installation
- Extraordinary Strength!
- Beauty that lasts for a lifetime!

Cities love our ornamental product as well as the privacy. It is beautiful in appearance, offers excellent security and requires no maintenance! This is a tax and maintenance dollar saver for your clients. Many firestations in DFW are graced with this ornamental Fiberfence® product featuring a 30' plus automatically operated sliding gate. Because the weight of our Fiberfence® product being half the weight of steel yet three times stronger than the tensile strength of steel, its ease of operation and quietness adds life to the motorized unit that pulls the gate. City officials rave about our ornamental product!

# Product Presentation:

**Fiberfence®** is one of a kind, patented pultruded fiberglass fencing product line with the three times the tensile strength of steel, pound for pound, yet light weight and durable. Fiberfence® is weatherproof, bug proof, totally non-corrosive, maintenance free, almost indestructible, offered in a variety of colors and styles with privacy, ornamental and ranch. Made in the USA, Keller, Texas.

## Applications:

Fiberfence® ornamental or privacy may be used in all fencing general and special applications such as screening, decoration, security, retaining or perimeter. You can choose any height to the inch! Residential or commercial. The look and strength of the commercial ornamental product line lends itself to a form of art as well as security and structure to beautify any landscape. Architects may take our product components and configure their own design to fit their project. It can be installed in the ground, on cement, retaining walls and even in water! Perfect for any application and completely weather and water proof!

## Fiberfence® is

### Privacy, Picket, Shadow Box Fence along with Custom Fiberglass Projects

Your clients can't go wrong with this beautiful, colorful addition of privacy fencing offered in any height, any color and may be installed on steel posts or matching fiberglass posts. Standard colors range from beige, white, gray, green cedar, brown solid colors to light wood grain look and dark wood grain look. Custom colors are available upon request. As with all other Fiberfence® products, the privacy fence offers longevity that outlasts any other fence in the market. Whether you are looking for security, a quieter space, or addition of permanent color to your landscape, this fence is for your client! You will never see a water sprinkler stain on this fence. This fence is totally washable and no chemicals will harm, not even the harshest paint removers or bleach. Fiberfence® has extraordinary strength of three times the tensile strength of steel and has been reported to hold up through even tornado weather. Panels are assembled with aluminum pop rivets and secured to either a steel or fiberglass posts. As seen in our example photos, these Fiberfence® components may be used in play ground equipment. The fence styles vary according to your design and height requirements.

Custom colored ornamental Fiberfence® is a must for any project where your client wants to preserve the same color scheme. Featured are photos of Cooks Children Hospital Daycare in Fort Worth, Texas. This privately funded project saved thousands and thousands of dollars for the owners because of no maintenance for Fiberfence®.
