

Professional Size Refrigerator / Freezer

Two separate cooling systems in one integrated built-in style

PureSource™ 2 ice filtration system effectively filters out contaminants for clean, better tasting ice.

Large 33.7 cubic feet of storage capacity to store all your fresh and frozen gourmet ingredients or party platters.

Innovative food organization system includes full-extension freezer drawers and tilt-out freezer bins offering easier access to food.

Plugs into standard wall outlet — no need for additional electrical work.

Dual refrigeration system, one for the freezer and one for the refrigerator — each with its own evaporator and compressor. This increases cooling efficiency and prevents odors from transferring between the refrigerator and freezer sections.

Fresh'n Clean™ air filtration system keeps the interior of the refrigerator and freezer smelling fresh while minimizing odors.

Transition lighting gradually illuminates the interior with soft, ample light every time you open the door.

Innovative food organization system includes robust, full-depth sliding shelves for easier access to food.

Dual split, fully-extendable humidity crispers assure fresh taste of foods that require storage at different humidity levels.

Gourmet pantry with wood wine rack allows meats, fruits, cheeses and even fine wine to be organized and stored separately according to your culinary needs.

Additional Features:

#44823 Refrigerator

- Counter-depth configuration
- Premium cast handles
- Advanced analog temperature gauges
- Upfront electronic controls
- 304 Stainless Steel

#44833 Freezer

- Counter-depth configuration
- Premium cast handles
