

Side by Side Refrigerators

Polar Freeze™ system quickly raises or lowers the temperature providing added flexibility when you need it and keeping food fresh.

Rapid Ice™ production system can produce up to eight pounds of ice in 24 hours, so there's no need to buy ice for last-minute gatherings.

Multi-level transition lighting gradually illuminates the interior with soft, ample light every time you open the door.

Innovative food organization system includes full-extension freezer drawers offering easier access to food.

Variable speed compressor system maintains a consistent temperature in the refrigerator and freezer versus a standard compressor powering on and off. This allows food to stay fresher.

PureSource™ 2 ice and water filtration system effectively filters out contaminants for clean, better tasting ice and water.

Digital temperature controls are easy to read and provide a more precise way to control temperature.

Fresh'n Clean™ fan-forced air filtration system keeps the interior of the refrigerator and freezer smelling fresh while minimizing odors.

Innovative food organization system includes SmartFit™ shelf and full-depth shelves offering easier access to food.

Temperature-controlled gourmet pantry with wood wine rack allows the temperature to be adjusted separately, so wines and other food can be chilled according to your needs.

Dual split, fully-extendable humidity crispers offer four humidity control zones, assuring fresh taste of foods that require storage at different humidity levels.
