experience
the difference

Experience should never be underestimated. And when it comes flooring, there is no one more experienced than Amtico. We've been delivering beautiful flooring solutions to design professionals and end users for over 40 years. By fully understanding the challenges and issues faced by architects and specifiers we can provide a level of service that makes Amtico an excellent choice. Aesthetically and in terms of performance, durability and maintenance, there's nothing quite like an Amtico floor. With the comprehensive collections available of naturally-inspired and innovative ranges, there's never been a better time to experience everything that Amtico has to offer.

Along with its inherent beauty and integrity of design, all Amtico luxury vinyl floors feature our world leading Multi Performance System. Taken individually, each of the layers can be considered the most advanced of its kind in the world. Together, they give our flooring a totally realistic aesthetic, unrivalled durability and unbeatable appearance retention.

MPS

Optional Urethane Treatment* – Super tough surface for added scuff resistance and reduced maintenance

**Performance Wear Layer 1** – Ceramic impregnated for improved slip resistance and durability

Performance Wear Layer 2 – High density for resistance to indentation

Aesthetic Color Layer – Totally realistic aesthetics created by our in-house design team

Backing Layer – A support layer providing a strong base for the aesthetic and performance layers

Urethane treated floors do not need to be initially polished or dressed, therefore reducing the time and costs involved in maintenance. However, it is still possible to dress or polish urethane treated floors if desired.

Amtico | commercial

Standard wood sizes available are: 3"x36", 4.5"x36" and 6"x36". Standard stone sizes available are: 12"x12", 18"x18" and 12"x18". Standard innovation sizes are: 12"x12" and 18"x18". All products are 2.5mm thick with bevelled edges. Non-bevelled edges are available upon request. Amtico commercial products are backed by a 15-Year product wear warranty.

STRATICA®

ECO-POLYMERIC™ GREENGUARD® Children & Schools Indoor Air Quality Certified floor score

Stratica: For all the right reasons.

Design Professionals today face challenges in their search for sustainable high performance building products that reduce the environmental impact of their projects. Stratica Eco-Polymeric™ flooring was developed to enhance the over-all function of the facilities in which it is installed. By achieving this, we have given designers an opportunity to create an environment in which people can thrive while working, learning and healing. With over 40 years experience in creating and producing premium resilient flooring, Amtico International has a well defined understanding of the challenges faced by environmentally conscious specifiers.

- Greenguard and Floor Score Certified
- Contains no chlorine and no plasticizers
- Outstanding indoor air quality with no detectable VOC emissions
- Lowest VOC category for adhesives (EC1)
- Maintained with only neutral cleaners
- Promotes the well being of users by reducing foot fatigue and noise levels
- Made from 20% post industrial waste

All woods are available in: 4"x39". All stones, abstracts and fusion products are available in sizes: 13"x13", 13"x19.5" and 19.5"x19.5". All products are 2.5mm thick with unbevelled edges as standard. Bevelled edges are also available upon request. Stratica products are backed by a 10-Year limited wear warranty.
