GLADIATOR® GARAGEWORKS ORGANIZATION REIGNS SUPREME.

Gladiator® GarageWorks. Modular, rugged storage solutions. With major sleek factor.

Delight your customers with the ultimate storage solution for the garage.

Gladiator® GarageWorks products are designed specifically for the harsh garage environment. Durable steel construction resists warping and cracking, while the seamless design and thoughtful product features make organization easy. All of this innovation is wrapped in a stylish Tread Plate design making the garage work and look better.

Visit GladiatorGW.com to see a complete list of products and how they can transform your customer's garages.

You can also download and apply 3D models of Gladiator® GarageWorks products directly into your CAD designs by going to Google SketchUp.

Together we can make a sustainable difference.

At Whirlpool Corporation, we're committed to being the building and design

professionals' go-to source for eco-efficient appliances needed to design, construct, operate and maintain green homes. We want to partner with you in developing designs that can make a sustainable difference.

Serving the design professional.

Whirlpool offers a number of complimentary services that benefit the design community. Our new

offering of 3D digital models for Google SketchUp allows you to download Gladiator® product models from the Google 3D Warehouse right into your CAD designs. You can also connect with Google Earth to see your 3D design on a jobsite to share with clients.

You can also access **online continuing education, CSI three-part specifications and**

CAD details at

Sweets.com.

Professional courtesy

appliance discounts for AIA,

AIBD, NKBA and IIDA members' personal use

are also available.
