Why Clay?

Design Style

Boral Roofing has the most extensive choice of profiles and styles of clay roofing tiles in the nation, ranging from traditional mission style barrel tiles to flat tiles that deliver the aesthetics of natural slate and wood shake. The unique design of our lightweight tile products allow for a wide variety of installation options including staggering, boosting, serpentine patterns and much more.

Durability

Clay tile is known for its long-term durability and longevity. Boral's modern manufacturing techniques enhance this durability, giving customers a roofing product that is sure to last.

Sustainability

Boral is the only roof tile manufacturer to receive the prestigious Cradle to Cradle Gold sustainability certification. Our clay tiles

are truly sustainable and do not cause harm to the environment for the life of the product. Our clay roofing products are made with up to 59% recycled raw materials and are 100% recyclable.

Value

Clay tile has proven its durability, longevity and aesthetic appeal over thousands of years. Boral offers a wide range of clay roofing products to fit any budget. From traditional mission tile designs to slate and shake flat profiles, Boral has a clay tile roofing product to meet any project's style and budget.

The Right Roof for the Right Climate

If you live in a climate that experiences full winter weather, consider our products that meet Grade 1 standards per ASTM C1167. If you live in a warmer climate, choose any of our standard weight or lightweight products.

In Stock

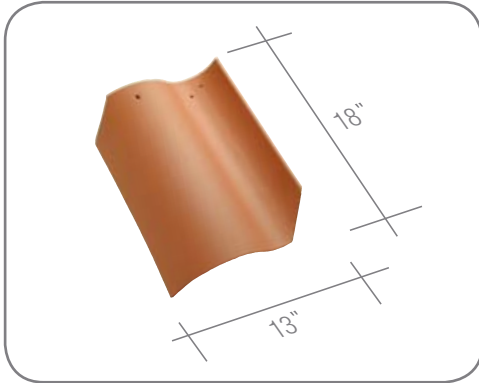

This product is kept in stock at the plant and is available for immediate pick up. You can call customer service to confirm product quantities before arriving.

Made To Order

Minimum order quantity is 25 squares. This product will be custom made per your order quantity and will be ready for pick up from our plant in two to three weeks from your order date.

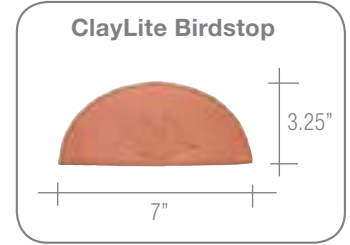

Choose from one of our many cool roof rated tiles that will improve the energy efficiency by reflecting sunlight and heat away from your roof. When these are combined with our Elevated Batten System, they will provide reduced cooling costs and they may even qualify for local rebates. The Cool Roof Rating Council (CRRC) measures the "coolness" of a roof by determining a roof's solar reflectance (SR) and thermal emittance (TE). Both properties are rated on a scale from 0 to 1, where 1 is the most reflective or emissive. The CRRC measures these two properties for roofing products, both for the product's initial values and after three years of weather exposure. Boral Roofing manufactures products that meet CRRC guidelines, allowing homeowners in some regions to receive utility rebates. Boral Roofing's products that are CRRC rated help reduce the heat island effect found in urban areas and in general, increases the overall energy efficiency of the building. For current product ratings please visit our website at www.boralroof.com and click on CRRC logo on the home page.

Coverage	Installed Weight / Square
At 3" minimum headlap, 88 field tiles will cover approx. 100 square feet of roof area.	Approx: 590 lbs.

Our ClayLite® product line embodies the innovation that has become synonymous with Boral Roofing. Designed specifically for the reroof market, our unique lightweight ClayLite products weigh less than 600 pounds per square, and do not typically require structural reinforcement.

Made from the same materials and processes as our traditional clay roofing products, ClayLite offers the superior performance, aesthetics, and kiln-fired color palettes with as much as 40% less weight.

Merlot Blend & Corona De Oro

Viejo Blend & Corona De Oro Blend

ClayLite tile delivers superior durability and consistency without compromising true, kiln-fired looks.

Monterey™ Shake 600

Modeled after traditional heavy hand-split cedar shakes, this lightweight product was developed to deliver a true rustic, realistic wood appearance, while adding the long lasting benefits of clay.

Weighing less than 600 pounds per square, Monterey Shake was specifically designed for the wood shake replacement market or those looking to replace asphalt roofs with a distinctive product.

Monterey Shake 600 meets Grade 1 standards per ASTM C1167.

Coverage	Installed Weight / Square
120 field tiles will cover approx. 100 square feet of roof area.	Approx.: 598 lbs.

Faux Mission Installation Technique

The “Faux Mission” installation technique gives architects, builders and homeowners the superior aesthetics of a traditional two-piece clay tile roof at an affordable price.

We carefully designed our ClayLite tile and our traditional 2-Piece Mission tile profiles to fit together, allowing a custom installation that provides the aesthetics of a traditional two-piece tile while capturing the cost saving benefits of a ClayLite. 2-Piece Mission tile is installed at the eave where the details of the roof are most visible. The ClayLite tiles are then installed on the rest of the roof for a much quicker and easier installation than a traditional two-piece tile roof.
