- 100% Recyclable

Nation’s Leading Sustainable Roof Tile Manufacturer

Natural & Extensive Color Offering

*Please refer to the Transferable, Lifetime Limited Warranty with Fade and Labor Coverage; details found on our website at www.boralna.com.
Why Clay?

**Design Style**
Boral Roofing has the most extensive choice of profiles and styles of clay roofing tiles in the nation, ranging from traditional mission style barrel tiles to flat tiles that deliver the aesthetics of natural slate and wood shake. The unique design of our tile products allow for a wide variety of installation options including staggering, boosting, serpentine patterns and much more.

**Sustainability**
Boral Roofing is the only roof tile manufacturer to receive the prestigious Cradle to Cradle Gold sustainability certification. Our products are truly sustainable and do not cause harm to the environment for the life of the product. Our clay roofing products are made with up to 59% recycled raw materials and are 100% recyclable.

**Value**
Clay tile has proven its durability, longevity and aesthetic appeal over thousands of years. Boral Roofing offers a wide range of clay roofing products to fit any budget: from traditional mission tile designs to slate and shake flat profiles, Boral Roofing has a clay tile roofing product to meet any project’s style and budget.

**Durability**
Clay tile is known for its long-term durability and longevity by being wind, hail and fire resistant. For Instance: it can still be seen at the Coliseum in Rome over 2,000 years after installation. Boral Roofing’s modern manufacturing techniques enhance this durability giving customers a roofing product that’s sure to last.

**Performance**
Boral Roofing clay tile products outperform virtually any roofing product on the market today. Clay tiles can withstand an array of extreme weather conditions without losing its beauty over time.

**The Right Roof for the Right Climate**
If you live in a climate that experiences full winter weather, consider our All Weather products that meet Grade 1 freeze/thaw standards per ASTM C1167. If you live in a warmer climate, choose any of our standard weight or lightweight products.
First appearing in the bronze-age on the temple roofs of kings, and refined through fire-baking by the ancient Greeks, 2-piece clay tiles have been the ultimate roofing product for millenniums.

Our highly refined modern manufacturing techniques have enabled Boral to improve on the ageless tradition and style of traditional 2-Piece clay tile design, and deliver color fast, durable products that last a lifetime.

Imported, handmade aesthetics set Cielo tile apart from any domestically produced product on the market today.

Manufactured exclusively and to exacting standards for Boral Roofing Products by CIT in Tecate, Mexico, Cielo tile delivers true hand tooled aesthetics handed down through the ages. All Cielo tile is made to the same standards as domestically produced tile and even uses the same quality clays Boral Roofing is famous for.

The modern design of our one-piece “S” Tile combines the cap and pan of a two-piece system into a single piece, delivering the same traditional aesthetics using fewer tiles, saving cost and installation time.

Made from the same natural clays and kiln-fired colors, our “S” Tile products are true to their roots, allowing custom roofscape options such as boosting, while maintaining the rich beauty and durability of clay at a substantially lower price.
