

Graham Sketch Door™

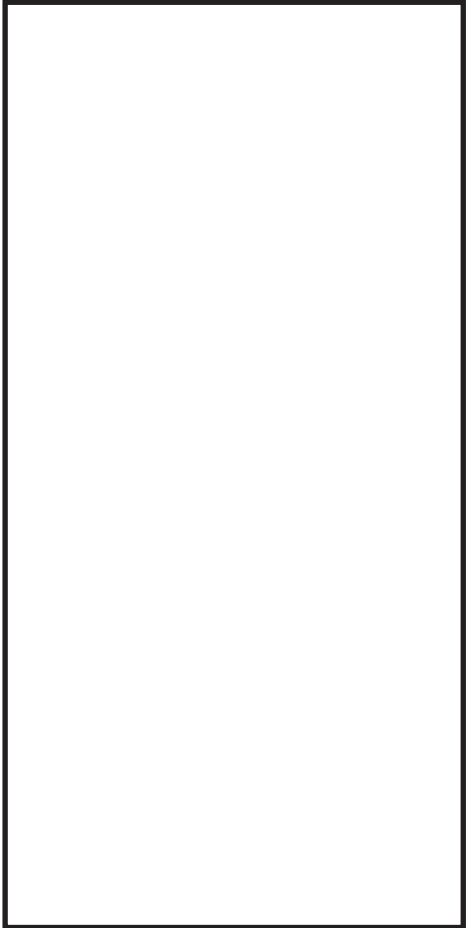

Tools

Custom Design Worksheet

Steps:

1. Draw design in door outline.
2. Write in dimensions for each line in design.
3. Define species type for each veneer piece in design*.
4. Identify grain direction for each veneer piece in design.
5. Specify edgeband species below.
6. Designate prefinish color below.
7. State door size(s) and associated quantities below.
8. Send to your Graham quoting or customer service representative.

Edgeband Species _____

Prefinish Color _____

Door Size _____

Number of Doors _____

*Color differentiation is achieved through species selection. Some helpful websites may be:

- www.formwood.com (Veneer Library)
- www.doogeveneers.com (Veneer Library)
- www.mbvener.com (Design Zone - Cover My World)

Some factors that impact the price of Sketch Doors:

- Species used in design
- Complexity of design
 - Straight lines vs. curved lines
 - Number of veneer pieces per skin
 - Intricacy of design
- Quantity
 - Graham will accept orders large and small; set up costs may apply
- Distributor mark ups (unknown to Graham)
