

ASSA ABLOY**Touch Sense Bars and Handles**

- Patented technology releases magnetic locks by sensing human touch
- Field adjustable to sense through clothing or gloves
- No moving parts reliability outperforms mechanical units
- DPST contacts release magnetic lock and signals access/alarm system
- Meets “no special tools or knowledge” code requirements
- Easy installation - not “handed”
- MagnaCare Lifetime Replacement Warranty
- UL listed

**BPS Linear Power Supplies**

- 1, 4 or 8 separate output circuit breakers based on model
- Clean linear power for flawless operation with sensitive electronics
- LEDs monitor zone status (voltage, no voltage)
- Internal lead acid battery charging capability while operating DC load
- Fire alarm relay terminal connections, releases devices upon activation
- Slide switches connect or disconnect power from load
- MagnaCare Lifetime Replacement Warranty
- UL listed

**DK-16 & DK-26 Digital Keypad/Entry Systems**

- Red, green and yellow LEDs indicate status and operation
- Remote circuit board inside metal enclosure for increased security
- 5 AMP DPDT output for lock and alarm shunt, camera call-up, rex input
- User code and/or hard code disable feature
- Wiegand output available
- 59 user codes - expandable to 119
- True 10-digit operation
- MagnaCare Lifetime Replacement Warranty

**GL1 2,000lb Electromechanical Gate Lock**

- Operates under preload up to 100 lbs
- Automatic dual voltage - no field adjustment required
- Fail Safe, but can be converted to Field Locked
- Manual key override (right or left hand)
- Self-aligning receiver adjusts +/- 1/2” horizontally and vertically
- Heavy wall 1/2” ID threaded steel coupling for Conduit
- Weather resistant
- MagnaCare Lifetime Replacement Warranty

M32/M62 Series 600lb/1,200lb Maglocks®

- High security maglocks featuring auto-sensing dual voltage
- Instant release circuit - no residual magnetism
- Low current consumption produces less heat and greater product life
- Installs easily using a minimum of tools
- Available with magnetic bond sensor (MBS) and door position switch (DPS)
- Mounting brackets and dress covers available to configure any door
- MagnaCare Lifetime Replacement Warranty
- UL listed

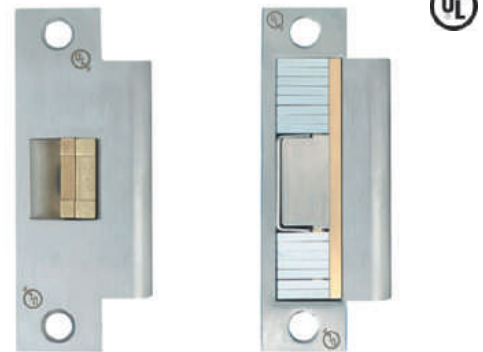

iMXDa 1,200lb Integrated Movement Exit Delay System

- “Learning” alarm initiate microprocessor is adjustable from 1/8” to 1”
- 12.5” overall length will fit most any door with a closer installed
- Magnetic bond sensor (MBS) and door position switch (DPS) standard
- DIP switch selectable options for delay, bypass, post alarm and relock
- iEXD version allows alarm initiation via an external panic device
- Bracket-mounted design improves strength and installation time
- MagnaCare Lifetime Replacement Warranty
- UL listed

UnLatch® and Mortise UnLatch® Strikes

- Fits standard ANSI 4-7/8” strike cutout - no cutting on the jamb required
- Motorized, no solenoids
- Fully concealed installation
- Maintains dead-latch function at all times
- Continuous duty
- Releases under preload
- MagnaCare Lifetime Replacement Warranty
- UL listed

DSB Dual Sense Bars

- Touch Sensing and mechanical movement in a single bar
- Redundant switching circuits meets all life safety standards
- All metal construction stands up to the toughest interior environments
- Completely immune to electrostatic discharge
- Optional illuminated “Push To Exit” and Microshield antimicrobial coating
- 3 standard lengths, but can be field cut to fit any opening
- MagnaCare Lifetime Replacement Warranty
- UL listed

MagnaCare covers every product that Securitron manufactures.

No product registration is required.

Your product will be replaced FOREVER for any reason, including but not limited to installation error, vandalism or act of God.
