THE COMPLETE SHOWER SYSTEM
PRECISION ENGINEERING AT UNPRECEDENTED SAVINGS

SAVE UP TO 60%
ON COMMERCIAL-GRADE SYSTEMS

SPECIAL OPPORTUNITY FOR HOSPITALITY AND COMMERCIAL CUSTOMERS
LIMITED TIME ONLY—OFFER EXPIRES OCTOBER 15, 2009 (WHILE SUPPLIES LAST)

THE COMPLETE SHOWER SYSTEM

Save Up to 60% on Commercial-Grade Systems
Precision Engineering at Unprecedented Savings

Restoration Hardware Contract is pleased to offer our Hospitality and Commercial customers unprecedented savings on commercial-grade shower systems, including both balance-pressure and thermostatic valve systems.

A minimum purchase of five shower system packages, at savings of up to 60%, is required and entitles you to choose from an additional assortment of bath add-ons at significant savings beyond our regular Contract discount.

Our signature collections include Asbury, Bistro, Chatham, Dillon and Modern in either chrome or polished nickel finishes. The unparalleled quality features solid and forged brass faucets and fittings and solid brass valve systems with German-made ceramic disc cartridges. The bath add-ons include items such as faucets, hand-held showers, towel bars, mirrors and sconces to complete the perfect bath.

These savings are available for a limited time only, while supplies last. Please contact your Restoration Hardware Regional Trade Development Leader for more information or to place an order (see contact information on back cover).

Offer expires October 15, 2009 (while supplies last).

QUALITY

All of our faucet and fitting components, such as handles, escutcheons and trim pieces, are engineered of solid and forged brass to exacting standards. Each component is mechanically and hand-tested for a solid feel, flawless performance and durability. All of our faucets and fittings are plumbing code-compliant.

Our solid brass Fluehs lavatory valve systems feature precision German-made ceramic disc cartridges that ensure a smooth, quarter-turn operation and continuous water delivery. Thermostatic Valves support multiple water outlets simultaneously and feature multi-function sensors that maintain pressure and a preset water temperature. Flow control valves are required for each water outlet and are used to control the volume of water flow. Balance-Pressure Valves support a single water outlet, control water flow, and monitor pressure between hot and cold for an even temperature. Multi-port diverters point the water flow in one of up to three directions and are used on balance-pressure shower installations with more than one water outlet.

DILLON COLLECTION
