

## Entrance Control Range

### Interlocks & Automation

Portals, airlocks, automatic doors, detection systems, operators and locks make up our portfolio of solutions ranging from classic access control up to certified high-security products with blast and bullet resistance.

### Performance Doors, Windows & Partitions

High-performance physical protection to resist burglar, ballistic and explosive attack. Product range includes steel and aluminium doors and partitions, modular security walling, ATM enclosures, custom counters, screens and transfer units, as well as specialist custodial and explosive resistant products.

### Airport

Solutions for immigration procedure, fast boarding access and exit flow control to secure airports and make it a smoother experience for passengers.

### Mass Transit

Wide range of specialised products for mass transit transport applications, including tripod turnstile, entrance gates and speed gates.

Gunnebo security group has an annual turnover of 1 billion US dollars and 6 500 employees. We are suppliers of integrated security solutions for banking, retail and other sectors requiring high-security protection. Our experience and presence make your world safer.

# Turnstiles

For smooth and reliable entrance control

# Turnstiles

## *Entrance Control...*

In order to regulate and control the flow of people into and out of buildings, Gunnebo offers a full range of turnstile solutions. We recognise the need for different types of solutions, depending on the level of security and freedom of movement required.

In public areas, the main aim is to regulate the flow of people in the right direction. In secure areas, such as offices or governmental departments, each individual must be identified as authorised before being allowed to pass. In sports stadia or airports, the entrance system must balance freedom of movement with tight security. In other words, varying degrees of regulation and control, depending on location.

## Entrance control for freedom of movement

In areas where there is a large flow of people, indoor turnstiles or speed gates provide discreet security which allows authorised individuals to pass through quickly and unhindered. Entry can be granted swiftly using a ticket, token or card.

### Product range includes:

Point-of-Sale: Pass-O-Mat, Girello, SwingGate

Tripod Turnstiles: DL 645, Simplex, SlimStile, TriStile

Entrance Gates: GlasStile

Opticals: OptiStile

Speed Gates: SpeedStile

### Typical customers include:

Retail

Underground/train stations

Airports

Corporate offices

Museums, galleries and other ticketed premises

Governmental departments

Banks

## Entrance control for high security

For a higher level of security, revolving security doors and full-height turnstiles (for outdoor use) are more appropriate. Combined with electronic access control – such as a code, swipe card or biometric identification – our full-height entrances provide you with the means to keep unauthorised individuals out.

### Product range includes:

Full-Height Turnstiles: RotaSec, ClearSec, RevoSec

Security Revolving Doors: AutoSec

### Typical customers include:

Sports arenas

Industrial sites

Corporate offices

Governmental departments

*...regulating the flow of visitors*

Pass-O-Mat

## Point-of-Sale

Designed to guide and control the flow of shoppers at retail outlets, allowing wheelchair and trolley access. Point-of-Sale includes mechanic and motorised swing gates, alarm and sensor detection systems, barriers and posts.

Girello

### Main Features

- Mechanical and motorised models
- Unidirectional passage
- Anti-panic push opening
- Stainless steel construction
- Flexible layout options
- Barriers and posts also available

TriStile O

TriStile E

SlimStile

## Tripod Turnstiles

### Main Features

- High flow rate – 40 people per minute
- For internal or external use
- Bidirectional passage
- Single or double walkways
- Choice of static fixed arm or drop arm
- Emergency setting to allow for safe evacuation
- Stainless steel construction with a choice of finishes

The Tripod Turnstile is a compact, cost-effective entrance solution with low power consumption and high reliability. Choose from standard versions or custom-design a solution. Suitable for internal or external use in areas where there is a large and constant flow of people.

# Entrance Gates

Entrance Gates are designed to combine smooth operation with uncompromised security. Easy to use for visitors, allowing simple entry into a building. Available in a wide range of finishes, the gates are ideal for buildings where style and design is important.

## Main Features

- Motorised entrance gates for building interiors
- High flow rate – 35 people per minute
- Bidirectional passage
- Extra-wide models for disabled access
- Emergency setting to allow for safe evacuation
- Range of modern designs with choice of styles and widths

GlasStile S

GlasStile RC

OptiStile 300

OptiStile 400

## Opticals – Non Barriers

*...innovative entrance solutions*

Designed and manufactured in the United States, this proven, high-quality product offers fast flow rates in security access monitoring and pedestrian control while possessing the versatility of design and functionality to suit all company environments. Available in barrier and non-barrier models.

### Main Features

- Bi-directional passage
- Sophisticated sensor system to prevent unauthorized access
- Optical detection only
- Audible card reader signals
- Visual card reader signals
- Finishes, tops, cladding available in a variety of materials
- Many options for lids; able to match most interior designs with marble, granite, corrian, etc
- Lid or frontal reader mounting
- Push button or touch screen desk-top control available
- ADA widths available

User-friendly  
security systems

OptiStile 300

OptiStile 720

## Opticals – Barriers

OptiStile 220

*...user friendly security*

### Main Features

- Bi-directional passage
- Glass panel or stainless steel arm barriers
- Sophisticated sensor system to prevent unauthorized access
- Normally open, normally closed, or always open (purely optical) modes
- Audible card reader signals
- Visual card reader signals
- Finishes, tops, cladding available in a variety of materials
- Mid-section of OptiStile 720 is clear glass
- Many options for lids; able to match most interior designs with marble, granite, corrian, etc
- Lid or frontal reader mounting
- Push button or touch screen desk-top control available
- Barriers drive to open position in emergency
- ADA widths available

## Security Revolving Doors

AutoSec

AutoSec

*...elegant design and high security*

Providing an elegant and extremely secure solution, Security Revolving Doors are ideal for high-profile buildings requiring high security. The doors prevent tailgating and piggybacking and can be fitted with a range of detection systems to achieve the appropriate level of security.

### Main Features

- Prevent tailgating and piggybacking
- Medium flow rate – 24 people per minute
- Simultaneous entry and exit
- Choice of exteriors and finishes
- Internal or semi-external installation
- Optional card reader or push button entry
- Emergency setting to allow for safe evacuation
- Different modes for day/night operation
