CONCRETE STAIRS

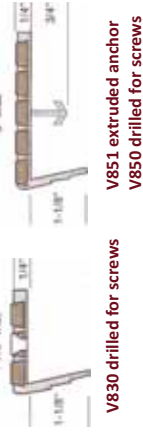

STEEL PAN OR

STEEL PAN OR WOOD STAIRS

STEEL PAN

RAMPWAYS &

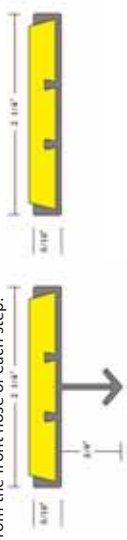

Designed to create a safe stairway indoors or withstand all weather conditions outside. Our treads are manufactured to handle heavy duty conditions. The anti-slip abrasive surface includes a high content of aluminum oxide to create the highest coefficient of friction possible. All treads are ADA and OSHA compliant. To add to the design and appearance of your project we offer nine standard color choices.

All treads are available in 9 standard color choices:
 Black, Brown, Burgundy, Grey, Yellow, Green, Red, Buff, Blue

V24 and V24H

Victory Treads style V24 is available with an extruded anchor for poured concrete or drilled for screws for wood stairs. V24 meets all requirements in the California Title 24 stripping code for the visually impaired which calls for an anti-slip strip of contrasting color 2" wide, parallel to and not more than 1" from the front nose of each step.

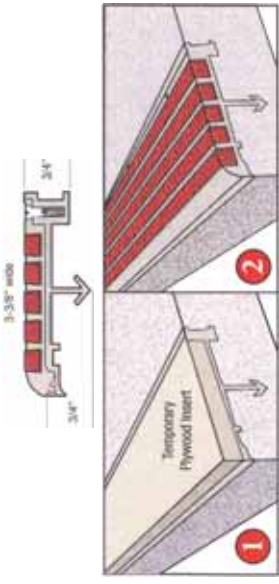

V24 extruded anchor

V24H drilled for screws

VICTORY 2-Stage

Our replaceable 2 part tread includes a base fitted with a temporary wood insert used during the initial pour and construction. The temporary insert is removed and the anti-slip tread is screwed into the base at the completion of construction. A replacement tread can easily be used at any time.

SPECIFICATIONS
 Provide anti-slip stair nosing style _____ as manufactured by Victory Treads, LLC, Pelham, AL 35124, 1-888-707-0005. Nosings to be type 6063 T5 extruded aluminum. Anti-slip abrasive shall include virgin grain aluminum oxide and/or silicon carbide. Abrasives to be locked in the extruded channels with a UV protected 2 part epoxy. Abrasive ribs shall extend above the extruded ribs a minimum of 1/16". Nosings shall not terminate more than 3" from the ends of the steps for poured concrete stairs; for pan stairs the nosings shall be the entire length of the steps less 1/8". Color to be black if no color specified.

Stock Items Available For Quick Shipment

Choice of color enhances the appeal of these handsome safety stair nosings. Designed for heavy duty use indoors and outdoors, these safety nosings meet and exceed all OSHA and Barrier-Free requirements.

IMPACT RESISTANT : These nosings are manufactured from an extruded aluminum base filled with a mixture of anti-slip abrasive granules in an advanced formula epoxy binder. Their remarkable strength is capable of absorbing heavy impact.

BARRIER-FREE : The designs shown are in compliance with the Barrier-Free Code, ensuring those physically impaired complete access to public buildings.

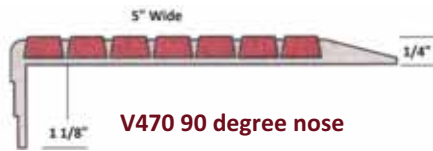

ANTI-SLIP SURFACE : Each abrasive-filled rib projects above the aluminum base for the greatest exposure of anti-slip surface in any tread now being produced in the United States.

CHOICE OF COLOR : Colors are locked into the epoxy abrasive mixture and will not fade or wear off, maintaining a rich color to blend with any decor.

ECONOMICAL : With our advanced technology stair tread specific plant our extruded treads are manufactured with attention to detail in an efficient manner. This cost saving process is passed on directly to the customer

RENOVATION REPAIR DESIGNS

V470 90 degree nose

V470S 83 degree nose

VISION LINE AVAILABLE FOR ADDED SAFETY

Victory Treads renovation stair treads offer an economical way to repair worn and potentially dangerous stairs. Our renovation treads are easy to install and provide a great looking safe stairway. All nine colors are available and for added visibility a vision line can be included.

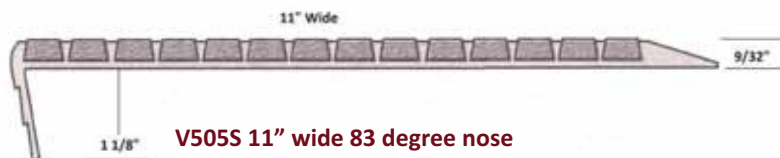

V500 9" wide 90 degree nose
