

Matéflex®

The Original Modular Flooring

SPORT FLOORING

Engineered for Peak Performance

Why Matéflex for sport tiles?

At Matéflex we know sports and flooring. That's why we engineer our state-of-the-art tiles for peak performance and near bulletproof durability. All our floors are portable and extremely low maintenance. And that's not all—these tiles are affordable and easy to install.

We were first, the original: Matéflex is the oldest U.S. manufacturer of modular tiles. We've been doing this since 1974 and we keep finding new ways to do it better.

We sweat the details: Attention to detail and dedication to rigorous standards make our snap-together tiles a high-quality sport flooring solution. We operate our own molding plant, so we're on the

front lines when it comes to quality control. We're also committed to the finest materials, and continually refining the manufacturing process to achieve the highest possible standards.

Variety: Most Matéflex tiles are available in all 16 of our standard colors.

Functionality: It all adds up to highly-functional, specialized flooring solutions brought to you by America's premier manufacturer of modular flooring. Matéflex, an excellent choice for any sport flooring application.

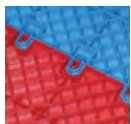

Features

All Matéflex tiles share the following features:

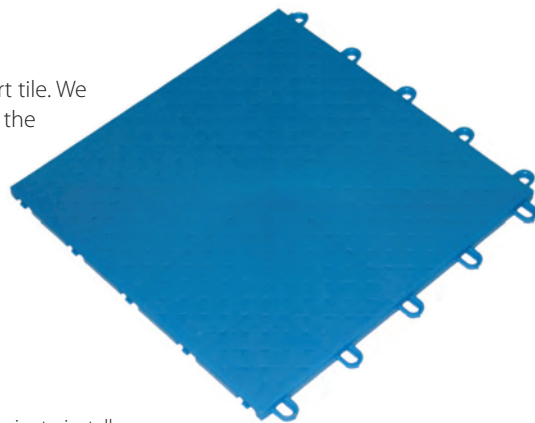

- Interlocking Modular Design
- Superior Durability
- Portability
- Free-floating System
- Quick & Easy Snap-together Assembly
- Comfortable & Safe Resiliency
- Colorfast
- Minimal Maintenance

ProGym™

Matéflex ProGym is our state-of-the-art, multi-sport tile. We created it to satisfy the needs of everyone, even the most demanding professionals. That means excellent traction and the comfort of superior resiliency. It's great for basketball, volleyball, gymnasiums, recreation rooms and multiple-use facilities.

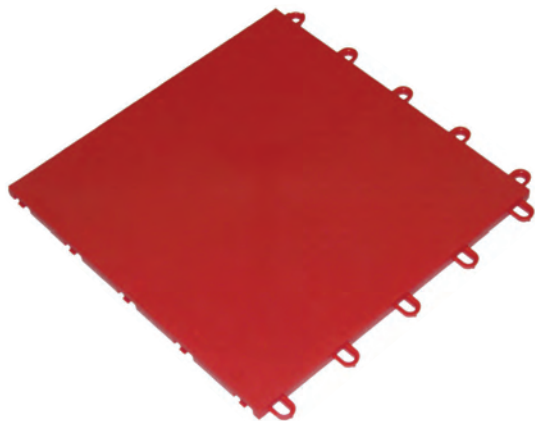

Our redesigned interlocking system is even easier to install.

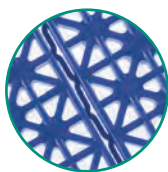

Inline Arena Tile

Designed with the same features as ProGym, our Inline Arena Tile provides the perfect balance between performance and durability, critical for the demands of Inline and Ball Hockey.

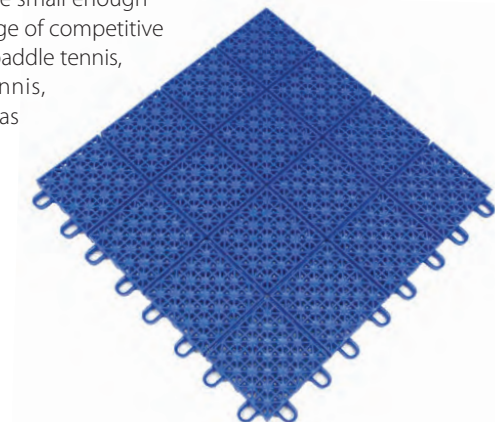

HomeCourt™

For the ultimate year-round sports complex tile choose HomeCourt from Matéflex. A HomeCourt designed court can be small enough to fit into most backyards, but big enough for a full range of competitive sports including badminton, basketball, inline hockey, paddle tennis, pickleball, practice sessions, shuffleboard, soccer, tennis, volleyball, and dozens of other games. HomeCourt has narrow gauge ribs for excellent traction, and the low-abrasion surface reduces wear and tear on sports equipment and shoes.

Engineered flex joints accommodate expansion and contraction and allow for base undulations with more lateral give and comfort.

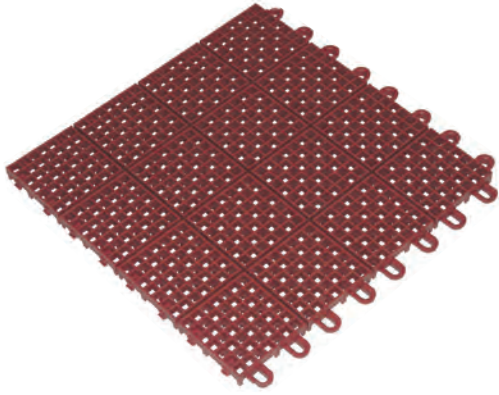

TileFlex™ Maple

Get the traditional look of a wood floor for a fraction of the cost. TileFlex Maple comes with a host of advantages that makes it superior to wood. A vinyl tile, it never needs refinishing, it's low maintenance and easy to clean. It also provides a cushioned surface that absorbs shock to reduce stress on joints and help fight fatigue. It's great for basketball, volleyball, aerobics, dance floors, spin rooms, Pilates and multi-purpose areas. TileFlex Maple is uniquely suited to below-grade installation where moisture problems exist. It is available in trim colors that can be used for out-of-bounds or key areas.

See back cover for more Matéflex modular flooring tiles.

Matéflex II

Matéflex II is an open grid tile specifically engineered from the ground up for tennis play. A Matéflex II surface combines the comfort and resiliency of a soft court with the durability and low maintenance of a hard court. The Matéflex II tile features a narrow gauge rib system for quick drainage, high traction and good ball bite (less skid).

Check out these other fine Matéflex flooring solutions:
