Silverbell Scallop

4x8

Both Home and Haven series' feature strong and durable vinyl and GlideLock (3) technology for an air tight fit between boards

OUR ADVANTAGES

We believe your time outside should be fun and carefree. That's why we work hard on our patented technologies to bring you beautiful, durable solutions backed by transferable Limited Lifetime Warranties.

COLOR THAT LASTS

You work hard for vibrant landscaping, and your fence shouldn't pale in comparison. Our advanced technology protects it from the sun's harmful rays so the color you choose today will keep a bright, like-new finish for seasons to come.

Even when the sun is at its brightest, your fence should be too. That's why we've created an exclusive color retention technology, SolarGuard, which helps your fence outperform others against the sun's harmful rays.

The secret of SolarGuard is in the unique composition of the fencing material itself. SolarGuard technology is actually infused as the fence is created, helping to protect its color from the inside out. Where standard fencing fades or discolors as a result of sun exposure, you can rest assured that SolarGuard helps your ActiveYards fence retain its original color beautifully for years, guaranteed.

PRIVACY & STRENGTH

Your private outdoor sanctuary should be just that: private. Our unique, patent pending design goes together easily, locking tightly into place without any gaps. And it gives you more than seclusion, too. GlideLock fencing holds up to wind better than traditional fences.

Relax outdoors in total privacy. With GlideLock, your ActiveYards fencing assembles like traditional pickets but locks together for a tighter fit. In fact, there are no gaps at all. The result is perfectly peaceful seclusion that will last a lifetime.

ActiveYards GlideLock fencing holds up in wind. That's because the tighter fit adds strength to your ActiveYards fence.

BETTER FROM THE INSIDE OUT

ActiveYards has a whole new way for you to think about aluminum fencing. With a patent-pending construction system called Corigin, we connect the pickets and rails from the inside, fortifying the core and building a fence that outperforms all other standard fencing. It's a smarter design that makes ActiveYards the strong, beautiful choice for your yard.

Our Strength is at the Core

What's the biggest difference? No screws. With time and weather, screws on traditionally built fences can loosen, rust or break. Our core is designed with interior locking pivots that grip each picket of the fence just as tightly as screws, but without the wear and tear.
