3 02 PREPARATION

A. General: Prior to installation, clean substrate to remove dust, debris and loose particles.

3.03 INSTALLATION

A. General: Locate the signage system as indicated on the approved detail drawing for the appropriate substrate and in compliance with the InPro SignScape installation instructions. Install signage systems level and plumb at the height indicated on the drawings.

Installation of Dimensional Signage

1. Determine the location of the Dimensional Letters on the wall. Tape the letter spacing guide on the

- wall where the bottom edges of the letters are to be located. The bottom edges of the dimensional letters overlap the letter spacing guide and aid the installer in properly spacing the letters.

 2. Apply foam tape, PL Premium Adhesive or a combi-
- nation of both to the back of each letter keeping the tape and adhesive away from the part of the letter that will overlap the letter spacing guide. Remove the release liner from the foam tape and
- position the bottom of the letter on the appropriate location of the letter spacing guide. Press the letter firmly to the wall. If using PL Premium Adhesive, wipe off any excess adhesive while it is still damp and tape the letters to the wall until the adhesive cures.
- 4. Some parts of a letter may be too small for foam tape. In these situations use PL Premium Adhesive to adhere these areas of the letters. Tape the letters to the wall until the adhesive cures.
- Dots, commas, apostrophes and other pronunciation marks may require visual alignment with adjacent
- 6. Remove the letter spacing guide from the wall.

3.04 CLEANING

A. At completion of the installation, clean surfaces in accordance with the InPro SignScape clean up and maintenance instructions.
