

Why do leading design and construction firms partner with ChargePoint?

Easy EV charging design and implementation for your clients' projects

BENEFITS

- + Reliable, market-leading EV charging solutions
- + Resources for smooth planning and fast delivery
- + Industry leading support and warranty
- + Earn LEED points and reach sustainability goals

KEY BENEFIT FOR YOUR CLIENTS

Differentiate properties to attract drivers and increase tenant satisfaction

BOTTOM LINE FOR YOU

Provide market-leading EV charging with precise planning, on-time delivery and easy installation

FEATURED CUSTOMERS

Reliable, market-leading EV charging solutions

Precise planning

ChargePoint's product specification documents, data sheets and CAD files improve your planning process and saves you time during the specification and submittal process

Fast shipping and delivery to project sites

Ninety-eight percent of standard orders ship within 48 hours directly to sites

Installation guidance and support throughout the project

Videos, installation guides and expert support services help you successfully manage the design and installation of your client's project

Reliable networked EV charging

ChargePoint Assure, the industry's first parts and on-site labor warranty, is provided for one year at no additional cost with an option to purchase additional years of coverage

Only with networked EV charging solutions can Property Owners:

- + Provide station location and availability to customers
- + Manage customer parking behavior
- + Set pricing policies and manage access
- + Provide 24/7 remote support for drivers all year long
- + Manage energy usage and costs
- + Monetize your charging offerings
- + Get 24/7 real-time visibility to station status and function
- + Generate usage reports and analytics

“ChargePoint is a proven leader in EV charging. With many successful installations, we undoubtedly stand by their products.”

—Jane Tan, Project Manager, Bergelectric Corp.
