PermaFlash® Bituminous Flashing System Interim Packaging Change
Bituminous Roofing Systems

Effective immediately, Johns Manville has changed the packaging for both the PermaFlash Primer and Kits as follows:

| Product | Item # | Old Packaging | New Packaging |
|-------------------|---------------|------------------------------------------|-----------------------------------------------------------------------|
| PermaFlash Primer | 70000664 | (6) 32 oz bottles/box | (6) 32 oz bottles per box filled with 16 oz of primer (half full) |
| PermaFlash Kit | 70000663 | 1 roll of scrim (2) 32 oz bottles/kit | 1 roll of scrim and (1) 32 oz bottle with 16 oz of primer (half full) |

This packaging change is an interim solution allowing JM to continue to offer PermaFlash primer within the states affected by the OTC (Ozone Transport Commission) Model Rule. **However, please be aware that this change is in effect everywhere the product is sold and not only in the Northeastern states.**

We understand the inconvenience this may cause and are working on an alternative packaging solution utilizing smaller 16 oz bottles. We appreciate your patience with us during this transition. Pricing will be adjusted to reflect this change.

Consult your local JM sales or technical representative for additional information.
