

Steel and Aluminum Sidewalk Doors

- ✓ Milcor sidewalk doors provide a safe covered opening for access to equipment or services located under sidewalks or for passage of personnel and materials from basement areas.
- ✓ Sidewalk doors can also be used as interior doors in areas where drainage is required. Recessed frames serve as continuous gutters to divert water to interior drain outlets.
- ✓ Milcor Models GA and GD are designed to support a uniformly distributed load of 300 psf. H-20 loading is also available for heavier load capacity requirements.
- ✓ Covers are mounted to stainless steel hinges equipped with zinc-plated stop chain and a rigid hold-open arm on each leaf.
- ✓ Single-Leaf Covers are equipped with automatic snap latch fixed inside and removable outside handles.
- Double-Leaf Covers are fixed with a throw bolt on the inactive leaf and a latching mechanism fixed inside with removable outside handles on the active leaf.
- ✓ Cover hinges bolted from the inside for easy maintenance.

Torsion spring mounted on frame on the inside to prevent freezing.
