

GENESIS VERTICAL LIFT

Enclosure and Shaftway models - for lifting heights up to fourteen feet

The Garaventa Genesis is a vertical platform lift designed to provide access into or within public buildings. It travels inside a complete, self-contained enclosure, as shown, or can be located in a shaftway constructed by others. Our unique, anodized aluminum design is strong, durable and attractive.

Shaftway Model

The Genesis Shaftway model fits inside a vertical runway that is built by others in accordance to Garaventa Lift specifications. The system consists of a drive mast, passenger platform and doors or gates. The shaftway can be completely enclosed, much like an elevator shaftway, or it can be open at the upper landing. A variety of doors and gates are available.

The lower landing of this Genesis Shaftway model was designed with filler walls.

- Platform dimensions are clear inside dimensions.
- Ramp required for floor mount
- If the tie back rail (spreader bar) is to be used to attach the mast to the shaftway wall, the shaftway width dimension will increase by 38 mm [1 1/2"]
- Mast-to-wall attachment required

Enclosure Model

The Genesis Enclosure model is a complete, self-contained vertical access solution. It is similar to the Shaftway Model except it includes its own pre-fabricated enclosure and integrated doors or gates. The enclosure can be built full height and fitted with a Plexiglas dome for weather protection, or can be left open at the top.

This Enclosure model combines anodized aluminum extrusions with Plexiglas panels.

The Garaventa Genesis OPAL model is a reliable, cost-effective accessibility solution for buildings or private residences. The OPAL can be installed indoors or outdoors when a hoistway or factory enclosure is not required. This durable lift features easy to use call stations, platform controls and is equipped with many built-in safety features. Maximum floor to floor travel, when floor mounted, is 1600mm (60") (per ASME A18.1).
