GARAVENTA LIFT ANNOUNCES NEW SLIDING DOORS

Garaventa Lift is thrilled to announce the release of new 3-speed side sliding elevator doors for our home elevators.

This new option will allow home owners and builders to create the same look and feel on their home elevator as a standard commercial passenger elevator.

Buyers can choose from three door packages:

The *Standard Door Package* features an accordion car gate and swinging hall doors by others. This arrangement has been the industry standard for years and continues to be available.

The *Upgrade Door Package* includes a 3-speed sliding elevator car door with swinging hall doors by others. This allows for the use of a swinging hall door which matches the other doors in the home. The accordion gate used in the Standard Door Package is replaced by a 3-speed automatic sliding elevator door for the cab.

The *Premium Door Package* includes 3-speed sliding elevator doors for both the cab and the hall doors. As the elevator approaches a landing, the car door engages with the hall door. Both doors slide open simultaneously, the same familiar way that sliding doors work on a commercial elevator.

The new 3-speed sliding elevator doors were revealed at the recent 2016 International Builders Show in Las Vegas to rave reviews. Plans are already underway to include Garaventa Home Elevators in the 2017 New American Home and the 2017 New American Remodeled Home.

GARAVENTA LIFT is a global organization that provides solutions to improve the quality of life for people worldwide. Our name stands for reliability, safety and innovation.

Reliability: Reliable products, reliable services, on-time deliveries.

Safety: Passenger safety, public safety, safe practices.
