

## Key Features

### Graber® CrystalPleat® cellular shades

CrystalPleat® double and single cell shades provide excellent energy-efficiency and acoustical properties. The unique cell construction delivers superior pleat retention and light control. Cords and cord holes are hidden providing greater privacy than conventional shades. All CrystalPleat® fabrics are ultra soft and backed with a neutral color for a consistent street side appearance.

### EvenPleat® and FashionPleat® pleated shades

Graber® pleated shades are available in a wide range of fabric styles and colors ranging from sheer to room darkening. The patented EvenPleat® technology features a back ladder support, which keeps every pleat crisp and uniformly spaced from top to bottom. The *Brighton* fabric meets NFPA 701 large-scale test.

### Continuous loop lift system

The continuous loop lift system is optional for all CrystalPleat®, EvenPleat® and FashionPleat® shades. The sleek, low profile headrail is extruded aluminum measuring 1-1/2" wide x 2" deep. A powerful clutch mechanism assists in lifting the weight of large shades and a cord tension device is provided to anchor the loop to the wall or window jamb. This system is recommended for shades that are greater than 72" in width and/or greater than 28 square feet in size.
