

Revolving Doors

Making the right entrance

Combining innovative products, quality engineering and complete customer support, Boon Edam supplies an unrivalled range of automatic and manual revolving doors, security revolving doors and secure entry portals worldwide.

Door Systems

Combining quality engineering with flexible design and complete customer support, Boon Edam supplies the largest portfolio of revolving doors available. Whatever the scale and purpose, our designs can be adapted to meet almost any criteria.

A revolving door creates a highly prestigious, safe and efficient entrance to almost any building. It also ensures immediate savings on energy costs along with creating a comfortable environment for staff and visitors to your building.

Security Access

Today's world demands accessibility and security at the same time. Combining these apparent contradictions is challenging, but accessibility and security meet each other in Boon Edam's wide range of ingenious security products.

We have developed one of the most sophisticated ranges of security access products available today, allowing you to monitor and manage the flow of people into and around your premises.

Your **Entrance**. Our **Technology**.

Manual Revolving Doors

Manual Revolving Doors

Manual revolving doors from Boon Edam offer a cost-effective means of maintaining a building's environment while allowing people to pass through freely.

Whether you are looking to conserve energy or increase comfort levels at your entrance, our wide range of 3-wing or 4-wing, high quality manual revolving doors provides the perfect choice for any medium traffic flow application.

TQM

The TQM is a high quality revolving door with eye-catching features. Its unique design combines architectural beauty and flexible dimensions with a wide choice of finishes and a comprehensive list of options to ensure a perfect entrance every time.

Crystal TQ

The Crystal TQ combines laminated and tempered glass to minimize the traditionally framed elements of a revolving door. The result is a virtually transparent revolving door that is perfect for use with contemporary glass facades while still blending in beautifully with more classical architectural styles.

Automatic Revolving Doors

Automatic Revolving Doors

Automatic revolving doors from Boon Edam are more than just doors. They are impressive entrance solutions that create a powerful first impression of your building while improving comfort and saving energy.

With a variety of doorset configurations and diameters typically ranging from 8'0" to 20'0", our automatic revolving doors provide the perfect solution for high traffic flow applications such as airports, hotels and hospitals.

TQA

The TQA is the smallest but most popular automatic revolving door in our lineup. Designed with the same technology and safety systems as our larger doors, the TQA provides maximum value at a significantly lower price point.

At 8'0", 10'0" or 12'0" in diameter, the 3-wing TQA provides a comfortable compartment size for most moderate pedestrian traffic. At 10'0" or 12'0" in diameter, the TQA can also accommodate wheelchairs.

Tournex

The Tournex is a sophisticated, 3- or 4-wing automatic revolving door with spacious compartments, easily able to cope with intensive pedestrian traffic flow while protecting the building environment from drafts. With a range of diameters up to 20'0", the Tournex is large enough to safely accommodate shopping carts, stretchers and wheelchairs, making it a truly impressive and versatile solution.

Duotour

The Duotour is a 2-wing revolving door with spacious compartments that easily accommodate large objects. It provides simple, bi-directional, straight-line access and provides a high capacity throughput of people. Two revolving triangular showcases at each end of the doorset provide valuable space for product displays or advertising.

Twintour

Our Twintour is a unique concept with an unprecedented passage capacity. The Twintour consists of two 2-wing revolving doors rotating at right-angles to one another. The specially developed synchronous drive ensures the entrance is always draft proof. The Twintour is our most economical door in terms of the energy it consumes and the energy it saves.

Security Doors & Portals

Every situation has specific requirements and we offer numerous possibilities for increasing the security level. Our high security revolving doors combine security with aesthetics to create fast, reliable security entrances. Our high security portals are compact and provide the highest level of security for particularly sensitive areas.

Often including sophisticated sensor systems such as StereoVision technology to ensure single person entry per authorization, these products are designed to remove the need for manned guarding at access points by preventing tailgating and piggybacking.

Security Doors & Portals

Tourlock 180+90

Our Tourlock 180 + 90 is a 4-wing security door that allows a continuous, bi-directional flow of authorized people while preventing tailgating and unauthorized entry.

StereoVision

StereoVision is our revolutionary overhead sensor system that recognizes shape, size and volume in three dimensions to detect and prevent piggybacking, ensuring an extremely high level of security.

TAP-50

Our TAP-50 half portal offers a unique solution for securing existing doorways. The TAP-50 is designed to retrofit your existing swing door and installs flush to the floor, eliminating the need for excavation. Ideal for data centers and other maximum security locations, the TAP-50 prevents piggybacking using a sophisticated ultrasonic overhead sensor to scan the cabin and deny access if two or more people are detected.

TAP-100 & 200

Our single entry TAP-100 and TAP-200 security portals prevent piggybacking and integrate with any access control system.

The small diameter TAP-100 cylindrical portal offers optional bullet resistant glass and optional metal detection to offer you maximum security and ease of mind.

The large diameter TAP-200 cylindrical portal provides flexibility and state-of-the-art technology to ensure the highest level of security with a larger portal size for ADA or other requirements. The TAP-200 can also incorporate a two-zone mat and bi-parting glass.

Circlelock 100 & 200

Boon Edam's Circlelock secure entry portal provides the highest level of security balanced with ease and speed of operation for your entrance. Several anti-piggybacking security systems are available with the Circlelock, including a two-zone mat and our sophisticated 3D StereoVision technology. Two different sizes are available to accommodate your various traffic requirements.

TAP-250

The TAP-250 multipurpose portal has an extended 72" cabin length for ADA compatibility and can accommodate small cart traffic. This single entry portal prevents piggybacking and integrates with any access control system.
