new!!

marmoleum® composition tile
certified sustainable tile

- MCT is 85% organic based with 66% bio-based content.
- MCT features a better balance between initial cost, ongoing cost and performance than VCT. Forbo will guarantee that MCT will INSTALL for $2.75-$3.45 ft2. Please visit www.forboflooringNA.com for pricing guarantee.
- MCT features occupancy ready Topshield and requires no initial maintenance, unlike VCT.
- MCT's inherent bacteriostatic properties combat MRSA and C-difficile, unlike VCT.
- MCT's natural anti-static properties repel dust and dirt, making it easy to maintain a clean and healthy environment.
- MCT has a third party, peer-reviewed publicly disclosed LCA analysis showing its exceptional environmental and performance profile.
- MCT meets the California CHPS 01350 for IEQ, and is financially beneficial to LEED projects.
- MCT has 10 times the indentation resistance of VCT, is more repairable than VCT, and is quieter under foot.
- Platinum certified to MTS SMaRT building product standard.

marmoleum®
dual topshield

The contrasting pigments of Dual, combined with a special production technique, create a deep, pronounced structure, giving the floor an almost stone-like appearance. There is a choice between neutral and saturated colors.

The pure tones of the Dual range are available in both sheet and tile form in all 30 shades. The tiles are available in a 13" x 13" or 20" x 20" size.

Multi-color and solid welding rods are available for all colors of Dual.

marmoleum®
graphic

![topshield]

Marmoleum graphic is a classic range concentrating on blacks, whites and grays, conceived in the artistic traditions of Rembrandt etchings and Escher lithographs. Marmoleum graphic is available in ten colors.

5313 aquatint	5312 libretto	5314 scenario	5305 scrabble	5302 print
5311 signo	5315 dry point	5306 domino	5303 litho	5301 sgraffito

marmoleum®
mineral

![topshield]

Marmoleum mineral draws its inspiration from the variety and richness of natural stone types in a spectacularly wide spectrum of shades and hues. Marmoleum mineral is available in sixteen sophisticated shades.

5702 moonstone	5704 citrine	5706 calcite	5708 carnelian
5701 serpentine	5703 moss agate	5705 sodalite	5707 sapphire
5709 crystal	5711 smoky quartz	5713 tiger eye	5715 obsidian
5710 diamond	5712 galenite	5714 hematite	5716 amethyst

Reduction of cleaning and maintenance time.

Independent testing shows that Marmoleum with Topshield con- siderably reduces the time needed for cleaning and maintaining the floor. The combination of the two-layered Topshield and Forbo's recommended cleaning guidelines ensures a perfect appearance at a low floorcare cost.

Topshield™ Performance

Topshield is an innovative finish that:
• eliminates the need for initial finish application
• reduces the use of chemicals
• enables lower cleaning costs
• provides a better long-term appearance retention than any other resilient flooring
• is OCCUPANCY-READY!

Topshield consists of a strong, durable primer and top layer to provide a highly effective shield against soiling.

The cross-linked primer ensures smoothness and durability.

The top layer guarantees resistance to scuffing and dirt. If desired, at a later time, the top layer can be cost-effectively renovated to renew the visual of the product.

new top layer   primer   Marmoleum

walton

topshield

This range is a tribute to Frederick Walton, who produced the first linoleum as early as 1863. The pure solid-colored Walton collection comes in eight tints and two crocodile patterns.

---

marmoleum®
dutch design

topshield

Forbo cooperated closely with twelve Dutch designers to create the Marmoleum Dutch Design collection.
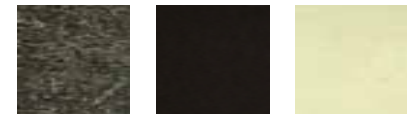

The twelve designers were granted complete artistic freedom. Their inspiration was very personal: a favorite color, a shade with a great future or a color missing from the current ranges. The result is twelve unique colorings, twelve designs each telling their own story.

bulletin board®

Bulletin Board is the choice for schools, offices, and other environments where a functional, washable, tackable surface is needed. It is also applicable as a decorative finish to furniture, doors, or even moveable partitions.

Bulletin Board is extremely durable, has a low level of light reflectance, and will not warp or crumble. It is available in an attractive palette of 12 solid through colors.

marmoleum®
surface solutions

Marmoleum is ideal for all types of furniture applications, including office, restaurant, and retail.

Performance benefits of Marmoleum Surface Solutions include a no-glare matte finish, natural anti-static properties, ease of cleaning and maintenance, availability in large sheets for seamless applications, and cost effective installation.

Choose from any color of Marmoleum Real, Dual, Fresco, Vivace, Piano, Mineral, Prisma, Graphic or the Colourful Greys!
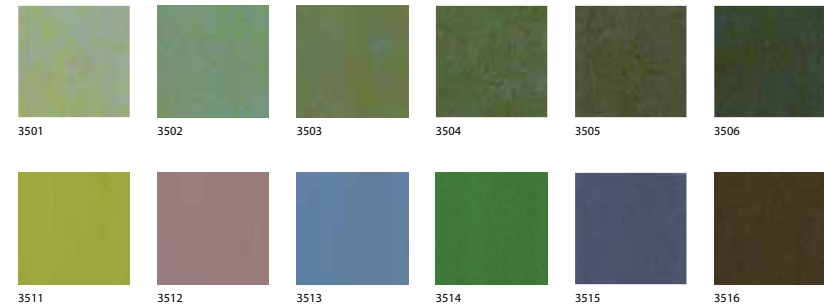

marmoleum®
colourful greys

topshield

Today's architects are increasingly selecting materials and colors to emphasize a specific spatial experience whereby light and reflections are used suggestively. Marmoleum Colourful Greys match this development perfectly.

The designs appear subtle - at first all one sees is grey - but on closer inspection, a marvel of color opens up.

colorex®

SD/EC

ColoRex is a conductive floorcovering made of conductive chips that show improved and long lasting performance. Conductive coated chips form a solid, homogeneous compound which is stable in size and dimensions. This is the reason why the electrical properties of ColoRex tiles are constant, permanent and not influenced by either ambient humidity or aging of the product. This is the most important selection criterion, considering that the properties of a floor covering are required to be permanent and that performance to specifications will be subject to regular inspection.
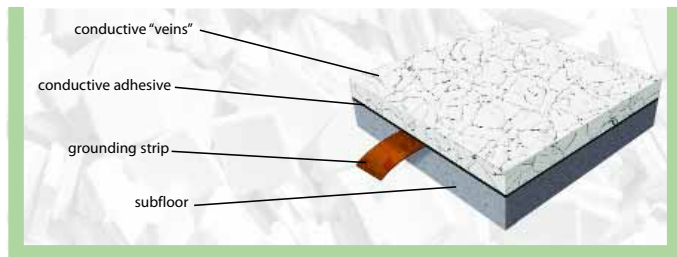

Applications for ColoRex include computer control rooms, process control & survey rooms, testing of electronic devices, health care / special areas, raised floors and many clean room environments.

tractionstep®
slip-resistant

Tractionstep Slip-Resistant is ideal for applications where standing moisture may be present or where superior slip-resistant performance is required. Applications include commercial kitchens, locker rooms/shower areas, indoor ramps, and hydrotherapy rooms. Its slip-resistance is achieved by embedding a substantial quantity of appropriately sized aluminum oxide and carborundum chips into the wear layer surface.
