

TWIRL JET SPAS

VIBRA-JETS TWIRL-JETS

"THE TWIRL MAKES THE DIFFERENCE"

Since 1968

Why Twirl Jet Spas?

The Twirl Jet Spa Therapy System is different than any other on the market today! From the patented six-hole "Twirl Jet" head, comes a Jet Stream of deep massaging, air-laden water with a "Twirl" to gently massage a larger area of the body than a single-hole jet used on other spas. Below the Twirl Jet Head, near the bottom of the spa, a six-hole Vibra Jet Head releases pulsating, warm-filtered air. Combined, the Twirl Jets and Vibra Jets produce the ULTIMATE in relaxing and stimulating hydro-air therapy.

Exercise Spa

This spa offers seating with excellent hydro therapy massage plus a 3' x 6' deep water exercise area. Add the optional under-water treadmill for a low impact walking or jogging aquatic workout.

About our Spas

The sizes range from the 8 foot diameter therapy spa, to the 20 foot combination therapy spa and swim spa. Spas are built for each project to meet the local code requirements and the owner's needs for commercial and residential projects. Modifications can be made from the standard specifications. If drawings of the spa and equipment area are sent to us, we will layout the piping and utilities and note any suggestions in the layout. We can also provide assistance with the health department permits. Installations include every state and many overseas locations including the Pacific Rim and the Caribbean. All Twirl Jet Spas may have an optional factory installed steel frame laminated to the spa bottom for an above ground installation on concrete, steel, or roof top.

Swim Spa

A combination therapy spa and swim spa that can be used for swimming and massage at the same time. It has the same great massage of the standard spas but can be used to swim against the current, as a treadmill or as a group exercise area. It is used in hospitals, hotels, YMCAs or in a home as a substitute for a large pool. It can be combined with the optional Ozonator system to reduce chlorine use by 50% or more.

Equipment Packages

Every spa comes with a pre-assembled "Equipment Package." It is factory built to meet each individual project. The "Equipment Package" is pre-piped and pre-wired, ready for field connection to the Spa.

Important - Piping is sized for maximum separation between the Spa skimmer and the Equipment Package of 35 FEET. If this is not practical, please call factory so changes can be made.

The residential Equipment Package produces the same Twirl Jet and Vibra Jet therapy action as the commercial package. The Jets are controlled by air switches in the spa coping. A time clock controls the purification and heat. The water is clean and hot any time you wish to enjoy relaxing therapy.

The equipment package can often be modified to fit, if proper access is available. Heaters include a choice of Gas, LP, Electric or Heat Exchangers using water or steam. Heat pumps can provide heat or cold for Chiller pools.

Each project is reviewed and modified from the architect's or contractor's drawings in order to meet existing conditions and insure health and building code compliance.

Factory Direct to Job Site

Price includes pre-piped, foam insulated "SPA" and piped & wired "EQUIPMENT PACKAGE" delivered prepaid, direct to the job site, anyplace in the United States or overseas freight forwarder.

Optional Heat Exchanger

Residential Gas Heater shown

Models 8-8-3; 7-10-3 1/2; 10-10-3 1/2

All Twirl Jet Spas may have an optional factory installed steel frame laminated to the spa bottom for an above ground installation on concrete, steel, or roof top.

Warranty

The Twirl Jet Therapy System is warranted for one year from date of installation and all demands made under said Warranty must be made in writing to Twirl Jet Spas Inc., 3990 Industrial Ave., Hemet, CA 92545-9790 during said period to be valid. Our expressed warranty is limited to the replacement of or repair of any part found to be defective due to workmanship or materials, at the option of the seller. There is no other warranty, express or implied.

Engineering & Code Approval

All Twirl Jet Spa Fiberglass shells are laminated with 300% safety factor for free standing or recessed in sand bed.

CAUTION - Submit for the state or local environmental (health) permit as early as practical so that any special or local interpretations of the code or any required changes can be made before shipment. Call for assistance with the health department permits. Although Twirl Jet Spas makes a great effort to meet all codes, we cannot be responsible for corrections after shipment.
