

STONE SPECIFIC™ POLISHED MARBLE, TRAVERTINE + LIMESTONE SEALER

- **Specifically formulated for optimum protection on polished marble, travertine and limestone**
- **20-Year Guarantee**
- **Penetrating sealer repels dirt, oil and stains**

PRICE

PRODUCT DESCRIPTION

Optimum protection on medium-density polished stone — marble, travertine and limestone. These stones are susceptible to etching and staining from acids and oils in foods such as coffee, tea, wine, orange juice, mustard and ketchup. Designed to penetrate and seal the polished stone surfaces to provide optimal protection, keeping your natural stone clean, vibrant and new. It is a premium water-based formula, low in VOCs (volatile organic compounds) and non-combustible. Low odor, pH neutral it can be used indoors or out, in commercial or residential applications. Allows moisture vapor transmission. Inhibits the growth of mold and mildew. Protects sanded or non-sanded grouts.

USES

Provides optimum protection for all types of polished stone such as marble, travertine and limestone. Specifically formulated to protect polished, medium-density porous natural stone. When optimum protection is required for polished natural stone. Protects fabricated or tiled stone surfaces covering kitchens, baths, walls or floors surfaces.

SURFACE PREPARATION

Surface should be dry, clean and free of waxes, sealers or finishes. TileLab® Heavy-Duty Cleaner & Stripper will clean the surface or strip wax and acrylic finishes. New installations: Allow grout to cure 48 hours before applying sealer. Test product in obscure area to ensure desirable results.

APPLICATION

Apply liberally using a new mop, lambswool applicator, sponge or brush. Keep surface of stone wet with sealer for 5 to 8 minutes, keeping a thin even coat on applied area. Allow it to penetrate for 15 - 30 minutes maximum. Wipe off excess sealer before it dries on the surface of the stone or grout. If initial coat has been absorbed, apply additional coat 30 minutes after first application. Follow the same procedures as before. Wipe stone dry with a clean cloth to remove any excess after 15 minutes.

EXPECTED WEAR

Lasts up to 20 years under normal conditions depending on hardness and texture of surface. Use factors, cleaning routines, harsh cleaning methods, sun exposure and weather conditions will affect wear.

CARE & MAINTENANCE

Do not use cleaners containing ammonia, acids or bleach; use StoneSpecific Polished Marble, Travertine + Limestone Cleaner + Resealer. Tile industry experts recommend testing sealed surfaces every two years. Apply a few drops of water on the surface. If it soaks in, a coat of StoneSpecific Polished Marble, Travertine + Limestone Sealer will be necessary to keep protection at peak performance.

CUSTOM®
BUILDING PRODUCTS

DRYING TIME

Drying time 2 - 3 hours. Do not clean for 24 hours.

COVERAGE

200 - 300 sq. ft. per quart (18.6 - 27.9 sq. M per 946 ml).
