

Windows

*Specializing in
Pass-Thru & Drive-Up
Applications and
Speak Hole Covers*

PRODUCT OVERVIEW

Construction: All windows are surface mounted – no obstruction or grooves in the counter. The bottom channel of vertical and horizontal sliding windows are fitted with a wool pile seal on the active sash and screen for counter contact.

Material: Frames and glass channels of heavy type 6063-T5 aluminum extrusions.

Screens: Standard brite aluminum. Optional fiberglass, and bronze aluminum screens are available upon request.

Finish: Anodized 204R-1 clear aluminite is standard. 215R-1 Clear, anodic hardcoat colors or white baked enamel is available for all windows on special order.

Due to additional thickness of baked enamel paint, powder coat paint and kynar finishes, sliding operation of windows may be hampered. Additional curing time may be required for special finishes.

Glass: 1/4" clear plate for windows not over 24" wide. For windows wider than 24", DSB glass is recommended. Glazing is extruded vinyl bead. NOTE: specify "Frames Only" or type of glass to be factory installed.

Bullet Resistant Glazing: Bullet resistant glass – 1 1/4" bullet resistant plexiglass, and 3/4" "Lexgard" is available in all stationary and registration window systems.

Shipping: All glazed windows are packed in wooden crates. Unglazed windows are shipped in cardboard cartons.

All shipping charges are "Freight Collect", unless prior arrangements are made.

LOCKS & COUNTER SEAL DETAILS

Locks: Sliding bolt or pin type locks are standard. Please specify type of lock desired. Optional key type locks are available at extra cost. NOTE: sliding bolt locks are not available on "BP" series windows.

A brush type wool pile counter seal is used to prevent drafts.

INSTALLATION

Place complete frame and window assembly on counter between mullions. Attach to mullions by concealed screws through channel walls.

Surround Detail: If window frame must be sealed into wall opening, an optional "Surround Frame" is available on special order that provides easy installation and removal of the complete window assembly for servicing. Mullions and counters by others.

Removable Sash Channel: A special removable frame is available on special order for Series "C" & "BP" window.

HOW TO ORDER

When you place an order or request pieces, there are several items we must know to provide you with the proper product and the right price. Please check the following items carefully so that we may serve you better.

- What series window or type of product do you need? Refer to our catalogue or price list for Stock No's.
- Provide us with the dimensions of width and height of each window.

- List each of your requirements for Type of Lock, Finish, Glass:

STANDARD LOCK:

- Standard Lock
- Screw/Pin Lock

Optional:

- Key Lock

STANDARD FINISH:

- 204R-1 Clear Aluminum

Optional:

- Medium Bronze
- Dark Bronze
- Black
- Baked Enamel
- White

GLASS:

- Frames Only
- Vinyl For _____
- DSB Glass
- 1/4" Plate
- 3/16" Crystal Glass
- 1/4" Wire Glass
- 1/8" Plexiglass
- 1/4" Plexiglass
- 1/4" Lexan
- 1/4" Tempered
- Other

If you require custom counters or special "Bullet Resistant" items, we will require a dimensioned drawing or sketch. Just "FAX" it!

24 HOUR FAX LINE (626) 579-0628

Our "FAX" line is available 24 hours a day. Send your drawings or sketch anytime and eliminate misunderstandings and wrong quotes. Get it right the first time — FAX IT!

SPECIAL ORDERS

"Special Orders Are Our Specialty"...The size of items listed in this catalog are standard items but we will gladly manufacture any special sizes you may require. The special sizes will be manufactured in the same time as a standard item. Special size pass windows are provided at no extra cost.

Custom and Bullet Resistant Windows and Counters

Custom Windows & Counters: Special sizes will be quoted on request. Submit required measurements: Width—distance between vertical mullions. Height—from counter top, up to the bottom of the horizontal member. Sash balances for the larger windows are available and custom windows are available and custom windows can be built to meet your requirements on special order. "FAX IT"—(626) 579-0628

NISSEN NIGHT REGISTRATION WINDOW

The Nissen Night Registration Window with 1 1/4" bullet resistant plexiglass consists of a counter, coin tray and surrounding housing constructed of 16 gauge stainless steel. The complete unit is designed to slide into a 14 1/2" x 19 1/2" rough opening.

NISSEN ROTATING SHELF/WINDOW

A convenient Rotating Shelf to serve package goods from an enclosed area. Aluminum construction with one fixed glass panel and speak hole for installation between mullions. Options include: stainless steel construction with security baffles, custom built vertical or horizontal combinations, with or without sliding windows.

STOCK NO.
RS200/RS201

FACTORY ASSEMBLED TICKET WINDOWS

The factory assembled unit includes the following: A 24" x 36" framed stationary window with a No. 410 speak hole with cover and No. 724 ticket window installed in 1/4" clear tempered glass. The unit includes a 24" x 18" x 2" - 18 gauge stainless steel counter.

Stock No. SCW102

Note: 1/2" glazing is available on special order.

STOCK NO. SCW102

FACTORY ASSEMBLED CASHIER WINDOWS

A stationary 30" x 30", 1/4" tempered glass window is complete with aluminum frame and a No. 410 Speak Hole installed. Counter and coin tray are fabricated of 18 gauge stainless steel.

Stock No, SCW103

Note: 1/2" glass or 3/4" Lexard (Bullet Resistant) glazing is available on special order.

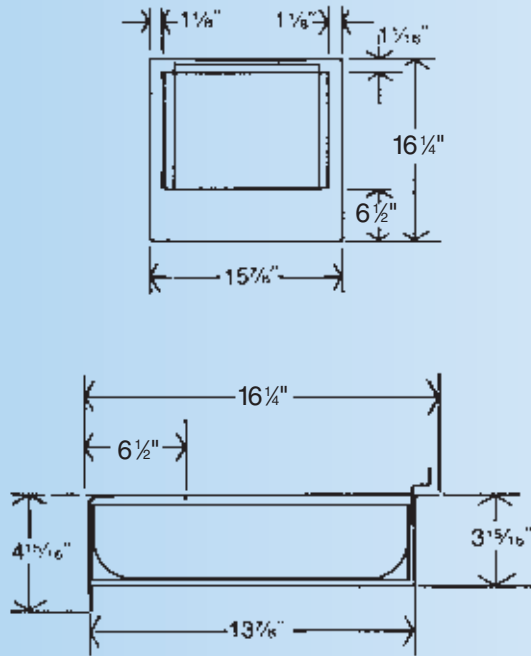

STOCK NO. SCW103

Note: All windows are shown from the inside looking out.

DEAL DRAWERS

This stainless steel sliding tray system is recessed in the counter top and front to achieve a flush appearance. Full width push-pull handle and solid bearing slides allow easy operation.

Stock No.4616 – Stainless Steel Sliding Deal Tray

TRANSACTION DRAWER

The weather resistant "Transaction Drawer" allows a clear view of the contents through clear Lexan lid preventing direct entry of outside air. The "Bullet Resistant" construction, materials and operation protects the operator at all times. Drawer is equipped with smooth action ball bearing extension slides (15" extension). Spring bill clip holds paper currency in place, stainless steel coin scoop for loose change.

Stock No.4424 Bullet/Weather Resistant Transaction Drawer

COIN & CASH TRAY

Coin and cash tray may be installed in new or existing counter tops. Allows glass to extend full length of opening to offer "Security in Serving".

Material: 18 gauge (.048) – 304 Stainless Steel with a #4 Fine Brush Finish.

Steel Sliding Fire Windows

3/4 HR. FIRE RATED-ICC-ES APPROVED

- **Spring Activated Automatic Closures**
- **1/4" Polished Wire**
- **Nail-On or Masonry Type Frames**
- **Munting For Glass Not Exceeding 720 sq/in.**

Fire resistant rating of 45 minutes in wall construction of masonry, wood or steel studs per report number 2781, as tested under fire tests of window assemblies, A.S.T.M.E. 163-65 and National Fire Protection Association number 257-70.

Windows are manufactured with an automatic closing device. A spring actuated closer which operates with a 160 degree fusible link mounted on the interior side of the frame.

Material: Frame and sash members shall be fabricated of 16 gauge cold rolled steel, formed and assembled with 12 gauge gussets and 16 gauge angles. Material complies with ASTM A366.

Weatherstripping: Sliding sash panel shall be fully weatherstripped with silicone treated wool pile or equivalent and vinyl. Fixed panel is bed in sealed to insure full perimeter weather seal.

Finish: All steel frame and sash members shall be furnished with a primer coat on all surfaces, (Optional White or Bronze Finish) conforming to Underwriters Laboratory specifications.

Glazing: Windows to be factory glazed with clear 1/4" wire glass. Lites to have minimum of 24 gauge wire with maximum opening of one square inch per Underwriters Laboratory. Individual lites of glass shall not exceed 720 square inches each. Glass complies with ANSI Z97.1 and ASTM C1036.

Hardware: Sliding panels shall be furnished with a positive latching 1/8" thick steel latch, which is attached to the bottom rail. It engages on a 1/4" thick keeper that is surface mounted to the sill member. A spring actuated automatic closing device used in conjunction with a 160 degree fusible link assembly mounted on the unit. This assembly functions as a self closing latch.

Optional Screen: Screen shall be fabricated from 5/16" x 5/8" tubular rolled formed aluminum sections. Screen cloth shall be 18 x 16 aluminum mesh. Screen shall be fixed mounted to the interior of the window frame through the use of aluminum spring clips. When in place, the screen shall not interfere with the operation of the sliding panel or impede water drainage from the sill.

Installation: The installer shall set out all window frames in a level, plumb and square conditioned without distortion. Units shall be promptly caulked, flashed and anchored in accordance with good window installation practice.
