DynaGlass

Panels from Chicago Metallic offer the design community multiple options. Panels can be specified for working spaces, healing spaces, active spaces and precision assembly spaces. Aesthetics and acoustical performance requirements can be satisfied with any one of CMC's panel systems.

Environmentally friendly EuroStone panels are quickly becoming the benchmark panel in transforming expectations. This unique blend of inorganic perlite can be specified for the most hostile of environments offering the best defense against mold and bacterial growth. Design vision is achievable with the variety of surface textures and edge details available. The complete system is resolved by specifying grid from Chicago Metallic.

BarrierPan panels are the choice in environments requiring particulate, temperature and humidity control. Paired with BarrierGrid, this Barrier System presents a complete ceiling solution for controlled environment facilities.

Endure panels are one choice for controlled environment (clean room) applications. The 2-mil vinyl-laminate surface is cleanable and impact resistant. This panel system is a low-cost solution for a variety of applications.

Harsh environments require a panel system that accepts frequent and deep cleaning. DynaGlass Panels meet this specification head-on. The surfaces are resistant to most harsh chemicals, solvents, milk acids and alkalis.

Panels from Chicago Metallic. Clinically correct. Design considerate.

POPULAR APPLICATIONS

Ideal for environments requiring rich, elegant, dramatic ceilings.

QUICK FACT

Add a decorative stain to Monarch GE to complement wall finishes.

FEATURES

- Lightweight design for ease of handling and cutting.
- Factory cutouts available for light fixtures, speakers, etc.
- Open coffer (accepts acoustical insert).
- No hold down clips required.
- Washable and portable.
- Optional factory applied paints and stains.

BENEFITS

- Extraordinary aesthetic appeal.
- Ease of cutting reduces installation costs versus competitive panels.
- Dimensionally stable. Will not warp, sag or shrink.
- Contains 70% post consumer recycled glass. 100% recyclable at end of useful life.
- May support eligibility for USGBC LEED Certification Credit.
- Optional panel patterns, see page 58.
- Stains available, see page 59.

POPULAR APPLICATIONS

Hospitals, hospitality, retail, airports, transit, offices, pools, stadiums, classrooms, corridors.

QUICK FACT

Ideal for pools where humidity and harsh chemicals abound.

FEATURES

- Unique inorganic, perlite blend supports indoor air quality while offering the best defense against harmful mold and bacteria growth without coatings or biocides.
- Contains no performance-enhancing chemicals used on other ceiling panel products that will harm the environment through decay or off-gassing.
- Won't rot, decay, sag or warp even in the harshest environments.
- The Chicago Metallic recycling program for used EuroStone ceiling panels expands the product's useful life.
- May be eligible for USGBC LEED® certification credit.
- Delivers the best life-cycle cost return on investment of any ceiling panel in its class.
- Optional panel patterns, see page 62.
- Colors available, see page 63.

DESIGN THAT RESONATES AND ABSORBS.

Whether you're looking for premium sound absorption for an open plan design, or an economical alternative for a commercial space—your concern for aesthetics remains central. That said, consider the strengths of Soft Touch.

POPULAR APPLICATIONS

Hospitals, hospitality, retail, airports, transit, galleries, offices.

QUICK FACT

Alternative for easy maintenance and high acoustical value and energy savings.

FEATURES

- Reduces noise and increases speech privacy.
- Stays flat.
- Fiberglass with 2 mil embossed vinyl finish.
- Perforated option available.
- Washable. Will not warp, sag or shrink.
- Moisture resistant, energy saving, high R values.
- Nubby – fiberglass with woven fiberglass fabric facing.

POPULAR APPLICATIONS

Semiconductor, pharmaceutical, hospitals, food processing, clean manufacturing areas, precision instrument assembly rooms.

QUICK FACT

Ideal for facilities requiring durable, highly moisture resistant, low particulate surfaces.

FEATURES

- Components and assemblies designed for use in ISO 14644-1 (Fed Standard 209E) controlled environment facilities.
- BarrierPan® and BarrierGrid™ deliver ease of installation and durable construction and are surfaces that withstand the rigors of daily or harsh chemical cleaning in today's cleanrooms.
- Combining BarrierPan® with BarrierGrid™ gasketed grid offers exceptional control of air and particulate movement from the plenum to the controlled environment
- Highly moisture resistant.
- Minimum 25% recycled content, 100% recyclable.

SUPREME IN SENSITIVE SPACES

The plenum may as well be another world. BarrierPan® ceiling panels exert uncompromising command over particulates, temperature and humidity in controlled environment facilities, while standing up to the rigors of frequent cleaning.

Premium

BarrierPan I

A smooth or textured, high-gloss FRP faced with 1/2" gypsum bonded to 1" foam

Standard

BarrierPan II

A smooth gloss aluminum surface bonded to a honeycombed plastic core for increased rigidity

Wall Channel

BarrierPan III

Features a high-gloss aluminum skin with high density polyethylene core

Wall Angle

BarrierPan IV

A textured high-gloss FRP skin with high density polyethylene core

POPULAR APPLICATIONS

Hospitals, hospitality, clean rooms, airports, transit, manufacturing, food processing.

QUICK FACT

Ideal for high scrubbing and power washing spaces.

FEATURES

- USDA-accepted fiberglass reinforced plastic (FRP).
- Surface resistant to chemicals, solvents, milk acids and alkalis.
- Washable, scratch, stain and impact resistant.
- White and colors, textured and smooth.
- Non-conductive.
- Unaffected by pressure washing and environmental fluctuations.
- Will not rust or support growth of mold, mildew or fungus.
- Colors available.

For more detailed product information, submittals or specifications, refer to the companion CD-ROM or visit: chicagometallic.com.
