

**WARRANTED FOR TOMORROW**

**WARRANTED FOR TODAY**

**Nobody covers you better. Nobody covers you greener.**

At Firestone Building Products, our roofing systems help reduce energy costs and emissions. Many of our products are made with recyclable material.\* Our plants are reducing waste and emissions. And our commitment continues—in our products, our programs and our practices.

The Firestone EnviroReady™ Roofing System is part of that commitment, letting our customers take the right kind of steps today to assure a better and more sustainable tomorrow.

To find out more about how Firestone is making a difference in helping to create and inspire greener building practices, go to [firestonegreen.com](http://firestonegreen.com).

\* Firestone products are recyclable. Recycling options are currently available in designated areas. Contact a local Firestone sales representative for details.

## Introducing Firestone EnviroReady™ Roofing System.

### A new green outlook on our Red Shield™ Warranty.

Everyone in the commercial building industry is making an investment in “greener” systems, materials and building practices. These steps help conserve valuable energy at a time when the responsible use of resources is a national concern, reduce greenhouse emissions in an era of climate change, and assist in earning points in the USGBC’s LEED® (Leadership in Energy and Environmental Design) program.

Now, Firestone is backing your investment in the future with an investment of our own: the Firestone EnviroReady™ Roofing System. This is the system of choice for those who plan to move forward with innovative green roofing options, such as photovoltaic (PV) or garden systems. Thanks to Firestone, now you can plan future environmental roofing upgrades, fully confident that Firestone has the products and the industry leading Red Shield™ Warranty coverage you need to maintain everything that will go under your next “green” roof.

Trust Firestone to offer a total system solution that will help support your sustainable building efforts, whether now or several years down the road.

### Firestone EnviroReady™ System

#### ADVANTAGES:

- Protects your roof today and lets you defer expensive green alternatives until costs become more attractive
- Covers upgrades to virtually any future environmental system, including garden and PV roofing systems
- No warranty disruptions during and after environmental roofing upgrades
- Covers inspections before and after installation of new green upgrades
- Coverage offered by no other roofing systems manufacturer—a Firestone exclusive

### Your system of choice whether you upgrade next year—or up to 7 years from now.

With the Firestone EnviroReady Roofing System, you can confidently choose the right roofing system for today’s needs, with green upgrades deferred until installation costs are more aligned with your budget.

Firestone’s comprehensive warranty keeps your new roofing system “enviro-ready” for green upgrades for up to 7 years after the initial installation. Should you decide to install PV panels or a garden roof during that period, Firestone will warrant the roofing system beneath these enhancements and continue to cover your system for the full extent of warranty coverage.

Warranty Requirements	
Warranty Length	Membrane Options
20 Year	.060” Firestone RubberGard Standard .060” or .075” Firestone RubberGard MAX .090” Firestone RubberGard Platinum .060” or .080” UltraPly TPO
25 Year	.075” Firestone RubberGard MAX .090” Firestone RubberGard Platinum .060” or .080” UltraPly TPO
30 Year	.090” Firestone RubberGard Platinum .080” UltraPly TPO

#### PV ROOFING SYSTEM

Solar power is an abundant source of clean energy and one option to channel that resource is the use of photovoltaic (PV) roof panels. With Firestone’s EnviroReady System covering your existing roof, you can take advantage of innovative photovoltaic technology in the future.

#### VEGETATIVE ROOFING SYSTEM

A vegetative or garden roof is a roof area of plantings installed above a waterproofing membrane. Firestone’s EnviroReady Roofing System, covered by the strength of the Red Shield™ Warranty, allows for uninterrupted coverage of the waterproofing system—before, during and after a subsequent garden roof.

When planning your next roofing project, make it enviro-ready with Firestone.  
For more information on the new EnviroReady System, call 1-800-428-4511.
