RubberGard™ LSFR PT

**FEATURES**
- LSFR PT is available in widths up to 30'
- MAX PT is available in both 7'-6" and 10' widths
- Available with either 3" or 6" tape*
- One panel per roll, reducing weight and handling issues of competing two-panel rolls

**BENEFITS**
- Labor savings—no need to mark panels or field apply tape
- Factory applied QuickSeam Tape, ensuring consistent placement and quality
- Reduces wait times associated with primer application, especially in cold weather

---

RubberGard™ MAX PT

Reinforced EPDM Membrane

---

The Next Generation of Contractor-Friendly Products.
The Firestone name is synonymous with quality, innovation and leadership. Through annual investments in research and development, we remain at the forefront of advances in roofing technology.

**Application Methods**

Firestone pre-applied tape results in contractor labor savings and superior performance.

Firestone pre-applied tape products are offered in both LSFR and reinforced MAX EPDM.

**RubberGard™ LSFR PT & MAX PT Product Information**

**Roll Width & Length:**
- Non-Reinforced PT
  - 10’ (3.05 m) x 100’ (30.5 m)
  - 12’-6” (3.81 m) x 100’ (30.5 m)
  - 20’ (6.1 m) x 100’ (30.5 m)
  - 25’ (7.6 m) x 100’ (30.5 m)
  - 30’ (9.13 m) x 100’ (30.5 m)
  (All are one-fold panels)
- MAX PT
  - 7’-6” (2.29 m) x 100’ (30.5 m)
  - 10’ (3 m) x 100’ (30.5 m)

**Pre-Applied Tape Width:**
- LSFR PT
  - 3” (76.2 mm)
- MAX PT
  - 3” (76.2 mm)
  - 6” (152.4 mm)

**Gauge:**
- LSFR PT
  - .045" (1.15 mm) and .060" (1.52 mm)
- MAX PT
  - .045” (1.15 mm), .060” (1.52 mm) and .075” (1.90 mm)

**Scrim:**
- MAX PT 9 x 9, 1000 denier fully encapsulated polyester scrim

**System/Installation Options:**
- Fully Adhered
- Gravel or Paver Ballasted
- Mechanically Attached

**Compatible Deck Types:**
- Steel
- Structural Concrete
- Lightweight Cellular Concrete
- Plywood
- Tectum
- Gypsum

**Code Approvals:**
- UL and FM Approvals
