FIRESTONE ROOFING SYSTEMS

THE RIGHT SOLUTIONS FOR YOUR BUILDING

Firestone
BUILDING PRODUCTS
NOBODY COVERS YOU BETTER™

FIRESTONE RUBBERGARD™ EPDM

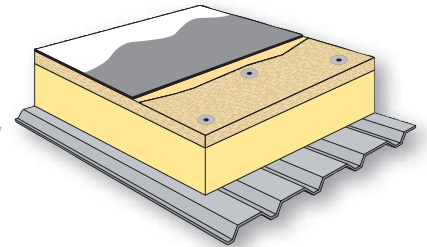

YOUR CHOICE FOR THE INDUSTRY'S STRONGEST EPDM SYSTEM—AND OUR STRONGEST WARRANTY

Firestone RubberGard EPDM exhibits outstanding resistance to ultraviolet (UV) radiation, ozone and weathering on actual rooftop installations and in accelerated weathering tests.

- Widely chosen material for both new and reroof low-slope roofing applications.
- Low life-cycle cost.
- Provides low maintenance and outstanding weathering characteristics in climates worldwide.
- RubberGard Pre-Applied Tape (PT) Products deliver uniform Factory Applied QuickSeam™ tape under controlled environment for faster installation and improved performance.
- Systems available: Fully Adhered; Mechanically Attached; Ballasted.
- Available in 1.1 mm (45 mil), 1.5 mm (60 mil), 1.9 mm (75 mil), or 2.2 mm (90 mil) thicknesses, as needed for a particular application. Non-reinforced 1.1 mm (45 mil) available with panels as large as 15 m x 61 m (50' x 200').
- Featuring Firestone RubberGard Platinum™
 - 2.2 mm (90 mil) of uninterrupted thickness
 - 30-year warranty
 - Unrivalled durability
- Now offering RubberGard ECO White™ EPDM, a highly reflective white EPDM.
- Can contribute to LEED credits
- Renewable and recyclable.*

*Recycling options available in designated areas. See your local sales representative for details.

All roofing systems offer a full line of roofing accessories.

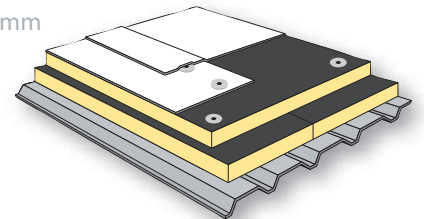

FIRESTONE ULTRAPLY™ TPO

YOUR CHOICE FOR CHEMICAL RESISTANCE AND ENERGY-SAVING REFLECTIVITY

White reflective UltraPly TPO exceeds the EPA ENERGY STAR® requirements.

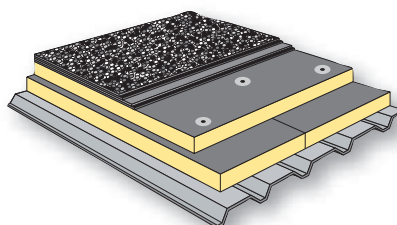

- Firestone UltraPly TPO combines the durability you expect from a Firestone membrane with the heat-welding properties of thermoplastic, and is ideal for use in many different roofing systems.
- Outstanding resistance to degradation from ultraviolet (UV) radiation, ozone and chemical exposure.
- Scrim-reinforced membrane provides excellent puncture, tear and abrasion resistance.
- Heat-welded seams form a homogeneous bond by fusing the top and bottom sheets together. The seams actually are stronger than the membrane itself.
- Systems available: ballasted; mechanically attached; fully adhered.
- Firestone UltraPly™ Platinum™ offers 2.0 mm (80 mils) of protection with a 30-year warranty.

FIRESTONE SBS MODIFIED BITUMEN

YOUR CHOICE FOR SUPERIOR PERFORMANCE

- Cold adhesive application eliminates open flames and hot asphalt odors.
- Glass-reinforced polyester fabric combines flexibility and puncture-resistance of polyester with the strength of glass.
- Unmatched on-the-roof performance during and after installation.
- Factory-applied granule surfacing provides long-term protection from UV rays and an attractive roof surface.
- Ideal for both new and reroof applications.
- Both standard and fire-retardant membranes are available to meet building code requirements.

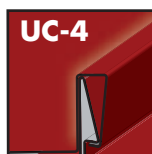

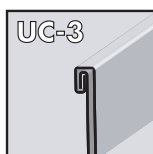

Each component of the Firestone Roofing System is designed and tested to meet or exceed industry standards.

FIRESTONE UNA-CLAD™ METAL

YOUR CHOICE FOR SECURITY, SIMPLICITY AND STRENGTH

- One of the leading suppliers of architectural metal products to the construction industry in the United States.
- Metal roofing systems protected by Firestone's Red Shield Warranty for consistent, clear coverage and peace of mind, backed by a global company.
- Available in a variety of applied finishes and materials, allowing maximum design freedom. Systems available in copper, painted steel or aluminum, bare galvanized, Acrylume®, RHEINZINK® and PatriotGreen™, in both flat and curved applications.
- Configurations include snap-lock, double-lock, flat, striated, ribbed and arched.
- Over 500,000 sq. ft. of production space, with facilities in: Anoka, MN; Jackson, MS; Miramar, FL; Morrisville, PA; Warren, MI; Reno, NV; Aurora, CO and College Park, GA.
- Unparalleled quality and service on flat-sheet, coil or full roofing systems.

Other profiles available at firestonebpc.com

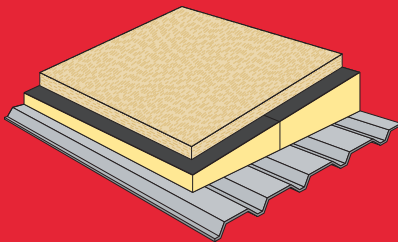

Firestone offers complete support for its metal roofing systems, from initial design development through successful project completion.

FIRESTONE ISO 95+™ POLYISO INSULATION

YOUR CHOICE FOR THE MOST COST-EFFECTIVE SUBSTRATES AND INSULATION

- Energy efficient polyiso has the highest R-value rating per inch of insulation.
- Compatible with all types of roofing systems.
- Can be attached with approved fasteners and plates, foam adhesives or hot asphalt to appropriate substrates.
- Meets requirements for direct-to-steel deck assemblies without an additional protective barrier.
- Tapered Estimating Team provides customized insulation and specification development for Firestone roofing systems.

Firestone's line of Polyiso Roof Insulation boards are compatible with numerous substrates, including steel, structural concrete, gypsum, tectum and wood decking.

Your single source for quality roofing systems.
