

NABCO ENTRANCES INC., the leader in the entrance systems industry, offers an exclusive line of Gyro Tech® products for the North American market. Each Gyro Tech product provides cutting-edge technology enhanced by dependable service and competitive pricing to give you total performance and value.

Our ability to create innovative new products keeps you on the forefront of technology and gives you viable solutions for the challenges faced in today's commercial environment. Meeting these challenges takes a responsive team that understands your requirements and, more importantly, understands the positive impact automatic door technology can have on your business.

Access Systems

Our Mission is to provide our customers with the highest quality, lowest cost of ownership automatic doors in the industry.

Sliding Door Packages

FULL OPEN WHISPER SLIDER

The GT 1175 Whisper Slider Series sets the standard for smooth operation and quiet “Whisper-like” performance. Designed for challenging conditions, wind, rain, snow and now even hurricanes are no match for the rugged GT 1175 Series.

GT 1175 WHISPER SLIDER

GT 1175 Whisper Slider is a fully automated door system including doors, jambs, operators and sensors. The GT 1175 has been tested and approved for class 1 vertical laminar flow **clean rooms** making it suitable for critical applications, as well as most other slide door applications. Microprocessor control provides reliable door operation, important usage counts, and diagnostic features for quick trouble-shooting and reduced maintenance costs. The standard GT 1175 offers fixed sidelights, full breakout and pocketed construction. Available in single, bi-parting and telescopic door configurations.

ALL GLASS SLIDER

GT 1175 ALL GLASS SLIDER

GT 1175 All Glass Slider completely eliminates vertical framing resulting in a sleek contemporary look. The GT 1175 All Glass Slider has all the heavy-duty features of the standard Whisper Slider combining dependability with elegance. Fixed sidelights are standard.

HD GT 1175 HEAVY-DUTY SLIDER

HD GT 1175 Heavy-Duty Slider is an extra-tough version of the standard Whisper Slider and has been engineered to support even the heaviest doors under high traffic conditions. Features include a heavy-duty motor-gear box and medium stile door panels for extra strength. Many options available.

GT 1175 HURRICANE SLIDER

GT 1175 Hurricane Slider complies with the High-Velocity Hurricane Zone of the Florida Building Code. An optional ADA-approved latch lever provides egress with one hand motion on fixed sidelight units. Tested Large Missile Impact Resistant and Cyclical Wind Pressure Resistant.

HEAVY DUTY SLIDER

TELESCOPIC SLIDER

GT 2100 SERIES MANUAL SLIDERS

Smoke-Rated.
Air Infiltration
Rated!

GT 2100 Series Manual Sliders have been designed for ICU/CCU applications where large access areas are required for the trouble-free transport of beds, gurneys and other medical equipment. This new series has been designed to allow users to stack the sliding door and swing panel to one side, allowing full opening access. GT 2100 Series incorporates Whisper Slider component parts for added durability.

HURRICANE SLIDER

SINGLE WHISPER SLIDER

MANUAL SLIDER

Swing Door Operators

GT 300

GT 300 HEAVY-DUTY, OVERHEAD CONCEALED SYSTEM

GT 300 Overhead Concealed System has toughness built right in. This heavy-duty system can handle even the heaviest pedestrian traffic. Its proven mechanical design provides smooth, long-lasting operation, while its flush swing arm gives it a cleaner, more attractive appearance. Pivots on the frame eliminate the need to remove the door panel to service the operator, allowing conditioned air to stay inside the building.

GT 400 HEAVY-DUTY CONVERSION UNIT

GT 400 Conversion Unit is designed to work with existing or new door installations. It has all the features of the GT 300 except that it is surface mounted. New side-load header makes installation and maintenance easier and faster.

GT 500 HEAVY-DUTY, LOW-ENERGY ADA OPERATOR

GT 500 Heavy-Duty, Low-Energy ADA* Operator provides all the necessary features for accommodating the elderly or physically challenged and it saves energy! The GT 500 with electromechanical closer operates in manual or automatic mode with microprocessor control that incorporates recycle and push-n-go features. A new side-load header makes installation and maintenance easier and faster.

GT 600/710 FIRE DOOR PACKAGE

GT 600/710 Fire Door offers state-of-the-art fire door protection. In the event of a fire emergency, the system powers down, allowing the doors to close and latch. Entry is prevented but personnel can exit by pushing the panic hardware.

GT 710 LOW-ENERGY ADA OPERATOR

GT 710 Low-Energy ADA*, Fire Door/Access System operates in both automatic and manual modes. It features a 2-60 second hold-open range and a "push-n-go" feature. In manual mode, the system closes slowly upon release to enable passage. The GT System 710 is the only operator with a hydraulic backcheck that protects the door and operator from damage when forced open in windy conditions or when manually opened. The GT 710, with its hydraulic closer, offers the flexibility to adjust the closing pressure as needed for specific site conditions. The GT 710 operator is approved for use on fire door assemblies rated up to 3 hours.

**Complies with ANSI 156.19 and the Low Energy operator section of ADA.*

GT 500

GT 600

GT 710

Gyro Tech now offers complete swing door packages including operators, door panels, sensors, jambs and guide rails.

Sensors, Activators and Security Access Systems

SENSORS

NABCO Advanced Sensor Systems offer performance, energy efficiency and compliance with all ANSI standards. NABCO Sensors now have dual voltage capability.

ACUWAVE "TOUCHLESS" SENSOR

NEW

The Acuwave "Touchless" sensor responds to a voluntary hand motion within the detection area. It is the ideal solution for heavy pedestrian-cross traffic areas such as sidewalks or hallways, and for "hands-free" environments like restrooms, healthcare facilities and clean rooms. The Acuwave will help prevent unnecessary door opening cycles, keeping conditioned air inside your facility and saving energy.

ACUGARD COMPLETE SENSING SYSTEM and ACUGARD 3 LE

This Complete Sensing System for swing doors employs focused, infrared sensors mounted on each side of the door to detect objects in the swing path. Acugard 3 sensors systematically adjust as walls or guide rails overlap the sensing area, providing continuous presence sensing throughout the door cycle. An Acumotion A sensor, included with the system, provides activation. Acugard 3 LE provides added pedestrian protection to low-energy/ADA doors.

ACUVISION LEARNING SENSOR SYSTEM

Acuvision Learning Sensor System for slide, swing or folding doors provides enhanced presence sensing covering the entire threshold area and moving path of the door. A unique ability to memorize the slide or swing path of the door allows for extended coverage which exceeds industry standards.

ACUMOTION A ADVANCED SENSOR

This unique hybrid sensor for sliding, swing or folding doors combines microwave activation technology and infrared presence sensing technology in a single unit.

ACUSENSOR 1B

Acusensor 1B for swing, sliding or folding doors, sets a new standard of sensing technology for efficient and reliable door operation. The versatile Acusensor 1B suits even the most challenging applications and exhibits excellent performance in adverse weather conditions.

ACTIVATING DEVICES AND SECURITY ACCESS SYSTEMS

NEW

NABCO offers a full array of activating devices, including push buttons, press plates, and remote and security access systems. The new security access offering includes access controllers, software, card readers, proximity readers, key fobs and biometric readers.
