

# Manual Doors for ICU/CCU Rooms

Perfect for Demanding Environments

Intensive and Critical Care Units are high-traffic areas where needs are constantly changing. Equipment such as wheelchairs, gurneys, medical carts and other devices are continuously brought in and out of rooms. To provide the varying number of hospital staff that rely on repeated and reliable access to ICU/CCU rooms, Besam has a complete line of manual sliding doors to fit any ICU/CCU room.

## ICU/CCU Sliding

Besam's ICU/CCU sliding door package has been redesigned and includes several improvements to the function, operation and breakout features on the trackless package:

- Features an appealing and functional closed header design that prevents spreading of dust, germs and debris while attractively framing your entrance.
- New design has an interlocking pivot configuration that prevents improper use during emergency breakout, and includes an effective tube that stops the door from being broken out if not in the full open position.
- Heavy-duty rollers, concealed pivots and associated hardware insure your package will operate flawlessly.
- Standard manual sliding door packages are available in 2-, 3- or 4-panel, and can be specified with trackless configuration.
- Also available with optional Positive Latch.

### A Variety of Options to Suit Your Needs

	ICU/CCU Sliding Doors	Telescopic	Bi-Way Swing/ Fold Doors
Trackless	●	●	●
Recessed Track	●	●	
Surface Mounted Track	●		
2-Panel	●		
3-Panel	●	●	●
4-Panel	●		
6-Panel		●	
Full Breakout	●	●	●
Fixed Sidelite	●	●	

## ICU/CCU Telescopic

This door system allows for a greater clear door opening when you require more space for your entryway.

- The telescopic variety is available in 3- or 6-panel configurations with full breakout and fixed sidelite packages as options.
- Can be specified with trackless, recessed track or non-panic configurations.

## Bi-Way

The Bi-Way package is an improvement on traditional ICU/CCU sliding doors, eliminating congested hallways and obstructions by floor tracks while providing ease of use for hospital personnel.

- The Bi-Way 3-panel unit combines the advantages of a manual folding door and a manual swing door.
- Opens easily and the swing door stays in the hold-open position when pushed to 90 degrees. In addition, a Besam Navig-Aider can be easily installed onto your existing manual door(s) to make it fully automatic.

## Positive Latch (optional)

Besam manual ICU/CCU sliding doors are available with an optional lock that will latch the active leaf in place when closed. A lever handle is provided on each side of the active leaf door to unlock the sliding door.
