Photopolymer Series
One-Piece Signage

What is Photopolymer?
Photopolymer is a photo-sensitive synthetic compound that hardens when exposed to an ultraviolet light source. To make photopolymer signs, we bond a clear, high resolution photopolymer sheet to a variety of base substrates.

Why buy Photopolymer signs?
Photopolymer one-piece signs reduce your maintenance headaches and provide you increased durability and vandal resistance. Our photopolymer signs are:

- Available in four materials to meet your needs: Clear PETG, Laminate, 3-Form or Aluminum
- ADA-Compliant with integral raised text & Grade 2 Braille
- Include custom logos, graphics and fonts to enhance your designs
- Available for interior or exterior use

Choose from 100 standard colors and 13 standard text colors that closely match IPC Interior Protection Products! *Custom colors available upon request.*

Clear PETG SPX10 with PRISM® Backplate

Clear PETG
Interior Grade

The most versatile line of photopolymer signage. Features a unique, clear PETG sign base that is moisture-resistant and allows for more design and color options. Clear PETG material is environmentally and user friendly. It is recyclable, biodegradable and shatterproof.

Imaginative sign solutions. Clear photopolymer is bonded to 3-Form's Varia™ series material – select from a wide array of innovative materials. The Varia material is encapsulated between the clear photopolymer layers for a creative sign solution. The Designer Series is environmentally and user friendly.
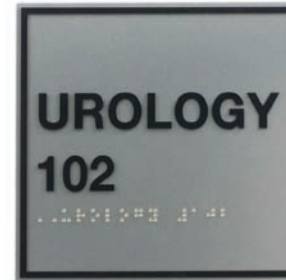

Exterior Grade Aluminum: Exterior photopolymer on aluminum. Features the industry's first pure, exterior-grade photopolymer resin. The resin has a 0% swell rate in moisture-saturated environments. Requires no extended treatments.

Interior Grade Aluminum: Consists of the same moisture-resistant photopolymer layer as found on Clear PETG signs; offers a brushed aluminum face appearance.

Frame Options
Aluminum Curved Face · Injection Molded · Northern Hardwoods

Aluminum Curved Face Frames
‣ Offers a contemporary look that is easy to update and cost effective due to modularity
‣ Clear lens available for non-ADA sign (if desired)
‣ Six standard sizes: 4"x4", 6"x6", 8"x8", 12"x12", and 8.5"x11"

SPX10
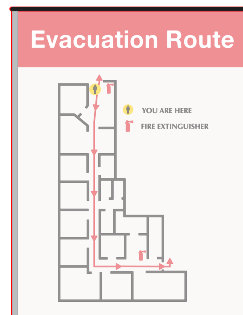

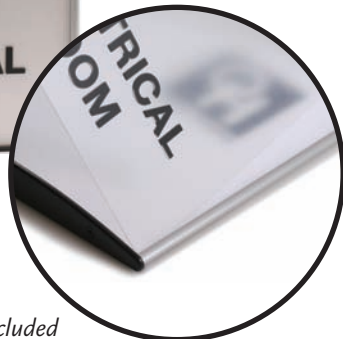

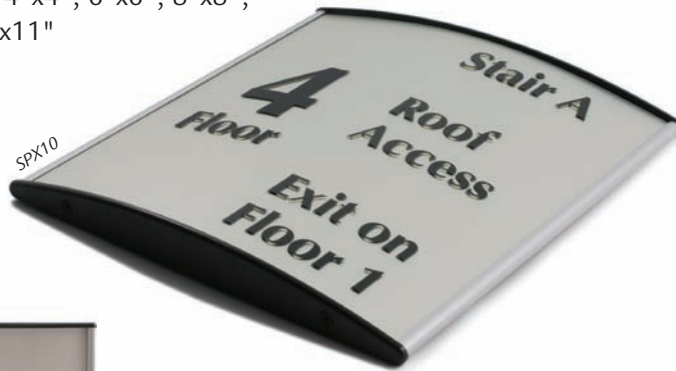

SPX40

A suction cup is included with your order for easy removal of the clear lens

SPX40

Injection Molded Frames
‣ Sign adheres into frame for vandal resistance
‣ Available in 100 standard colors that **perfectly match** InPro products, including photopolymer sign colors and IPC Interior Protection Products!
‣ Six standard sizes: 2"x8", 4"x4", 4"x8", 6"x6", 8"x8", 12"x12"

Northern Hardwoods™ Frames
‣ Available in Red Oak and Maple Wood in seven stain finishes, or Bamboo in Natural or Carbonized
‣ All finishes **perfectly match** IPC Northern Hardwoods handrails and chair rails!
‣ Standard sizes
  ‣ Square: 3"x11", 5.5"x5.5", 10"x10", 16"x16"
  ‣ Rounded: 3"x11", 5.5"x5.5", 10"x10", 16"x16"
  ‣ Arch: 7"x5", 9"x7", 20"x14"
  ‣ Oval: 4"x6", 9"x11", 14"x18"

Environmentally Friendly Signage for a Healthier World

InPro SignScape is committed to providing a complete selection of environmentally friendly materials for signage. The Clear PETG series, Laminate PETG Series and Designer Series are processed in plain tap water, providing you an environmentally friendly selection without sacrificing quality. Choose the Clear PETG Series for its recyclable and biodegradable features. Laminate PETG Series offers many design options and bonds to hundreds of laminate substrates. And the Designer Series offer non-toxic bonding with up to 40% post-consumer recycled content.
