DURON
INDUSTRIAL COATINGS

DURA CLAD®

Duron offers a complete line of Industrial Maintenance Coatings under the DURA CLAD name. DURA CLAD began as a two-component, polyester epoxy coating more than 30 years ago. Since that time, the DURA CLAD name has grown into an entire product line of coatings that now includes everything from alkyd shop coat primers and high build epoxy coatings to high-solids polyurethanes.

All DURA CLAD products are formulated to meet the VOC restrictions in place in the regions where Duron operates, and are lead- and chromate-free. Industrial contractors have field tested and proven each DURA CLAD product successful.

DURON
INDUSTRIAL COATINGS

Whether you're painting manufacturing equipment, sporting facilities, hotels or government buildings, there's a Dura Clad product just right for the job. Duron's complete line of industrial maintenance coatings include heavy-duty primers and finishes which provide excellent resistance to abrasion, chemical environments and severe weather exposures.

Substrate:	Finish Coating:	Recommended Coating System:
Structural Steel and Iron; Interior Walls Interior Joists Interior Doors Interior Support Beams Moderate- Severe Environment	Waterborne Acrylic	One (1) Coat Dura Clad 50 Alkyd White or Red Oxide Metal Primer One (1) - Two (2) Coats Dura Clad Direct-to-Metal Acrylic, 300 Gloss or 350 Semi-Gloss
	Alkyd- Silicone Modified	One (1) Coat Dura Clad 50 Alkyd White or Red Oxide Metal Primer One (1) - Two (2) Coats Dura Clad 200 Silicone Alkyd Gloss Enamel
	Alkyd- Urethane Modified	One (1) Coat Dura Clad Shop Coat Primer, Red Oxide or Gray One (1) - Two (2) Coats Dura Clad Urethane Modified Alkyd Gloss Enamel
	1-Part Waterborne Epoxy- Eggshell, Semi-Gloss or Gloss	One (1) Coat Dura Clad 62 Universal Acrylic Metal Primer One (1) - Two (2) Coats Dura Clad Pre-Catalyzed Acrylic Epoxy; Eggshell, Semi-Gloss or Gloss
	1-Part Waterborne Acrylic Urethane- Gloss	One (1) Coat Dura Clad 62 Universal Acrylic Metal Primer One (1) - Two (2) Coats Dura Clad 950 (Single Component) Waterborne Urethane, Gloss
	High Build Epoxy- Gloss or High Solids Epoxy- Semi-Gloss	One (1) Coat Dura Clad 85 Rust Inhibitive Epoxy Primer One (1) Coat Dura Clad 800 High Build Epoxy Gloss -or- Two (2) Coats Dura Clad 825 Fast Cure Epoxy, Semi-Gloss
Structural Steel and Iron; Exterior Racking Exterior Storage Tanks	Alkyd- Silicone Modified	One (1) Coat Dura Clad 55 Universal Alkyd Metal Primer One (1) - Two (2) Coats Dura Clad 200 Silicone Alkyd Gloss Enamel
	Waterborne Acrylic	One (1) Coat Dura Clad 62 Universal Acrylic Metal Primer One (1) Coat Dura Clad Direct-to-Metal Acrylic, 350 Semi-Gloss or 300 Gloss -or- Two (2) Coats Dura Clad Direct-to-Metal Acrylic, Semi-Gloss or Gloss in ready-mixed colors
	1-Part Waterborne Acrylic Urethane- Gloss	One (1) Coat Dura Clad 62 Universal Acrylic Metal Primer One (1) - Two (2) Coats Dura Clad 950 (Single Component) Waterborne Urethane, Gloss
	Urethane- Aliphatic	One (1) Coat Dura Clad 85 Rust Inhibitive Epoxy Primer One (1) Coat Dura Clad 900 High Solids Urethane, Gloss One (1) Coat Dura Clad 825 Fast Cure Epoxy, Semi-Gloss One (1) Coat Dura Clad 900 High Solids Urethane, Gloss
	High Build Epoxy- Gloss	One (1) Coat Dura Clad 925 Moisture-Cured Urethane Aluminum Primer/Finish -or- One (1) Coat Dura Clad 85 Rust Inhibitive Epoxy Primer One (1) Coat Dura Clad 800 High Build Epoxy Gloss
Concrete Floors; Subjected to Mild-Moderate Chemical Exposure	Epoxy	Two (2) Coats Dura Clad 825 Fast Cure Epoxy, Semi-Gloss
	Clear Urethane	Two (2) Coats Dura Clad 925 Moisture Cured Urethane, Clear
Concrete Floors; Not Subjected to Chemical Exposure	Epoxy	One (1) - Two (2) Coats Dura Clad 800 High Build Epoxy, Gloss
High Temperature Applications From 500°F to 1000°F	Metallic Aluminum	Call 1-800-72DURON ext. 3293 for a product recommendation
Concrete and Steel; Subjected to Splash & Spill	Polyamide Epoxy	Two (2) Coats Dura Clad 850 Polyamide Epoxy, Semi-Gloss -or- One (1) Coat Dura Clad 85 Rust Inhibitive Polyamide Epoxy Primer One (1) Coat Dura Clad 850 Polyamide Epoxy, Semi-Gloss
Concrete and Steel; Continuous Immersion	Fast Cure Epoxy	Two (2) Coats Dura Clad 825 Fast Cure Epoxy, Semi-Gloss

ELASTOMERIC & MASONRY COATINGS

Maxflex Premium Elastomeric Finish Coat provides a flexible waterproofing coating for exterior, above-grade masonry, stucco, poured and precast concrete and E.I.F.S.

Dura Crete 100% Acrylic Texture Coatings provide a breathable, weatherproofing barrier and meet the requirements of Federal Specification TT-C-555B for wind-driven rain.

Elastomeric Coatings

Substrate:	Finish Coating:	Recommended Coating System:
Exterior Vertical Concrete, E.I.F.S., Dryvit, Poured and Precast New Concrete	Smooth	One (1) Coat Maxbond Surface Conditioner, Clear or Pigmented Apply Maxflex Elastomeric Patching Compound-as needed One (1) Coat Maxflex Premium Acrylic Elastomeric Finish
New T1-11 or Plywood	Smooth	One (1) Coat Bond-N-Seal Acrylic Primer Apply Maxflex Elastomeric Patching Compound-as needed One (1) Coat Maxflex Premium Acrylic Elastomeric Finish

Waterproof Coating System

Substrate:	Finish Coating:	Recommended Coating System:
Exterior Vertical Above-Grade Masonry; Waterproof Coatings	Smooth- Solvent Based	One (1) Coat Dura Crete High Build Solventborne Waterproof Coating- Smooth
	Textured- Solvent Based	One (1) Coat Dura Crete High Build Solventborne Waterproof Coating- Sand or Medium
Exterior Vertical Above-Grade Masonry; Weatherproof Coating Systems	Smooth- Water Based	One (1) Coat Maxbond Surface Conditioner- White -or- One (1) Coat Dura Crete Acrylic Masonry Primer Apply Maxflex Elastomeric Patching Compound- as needed One (1) Coat Dura Crete High Performance Exterior 100% Acrylic Masonry Finish, Smooth
	Fine- Water Based	One (1) Coat Maxbond Surface Conditioner- White -or- One (1) Coat Dura Crete Acrylic Masonry Primer Apply Maxflex Elastomeric Patching Compound- as needed One (1) Coat Dura Crete Exterior 100% Acrylic Texture- Fine
	Medium- Water Based	One (1) Coat Maxbond Surface Conditioner- White -or- One (1) Coat Dura Crete Acrylic Masonry Primer Apply Maxflex Elastomeric Patching Compound- as needed One (1) Coat Dura Crete Exterior 100% Acrylic Texture- Medium
	Coarse- Water Based	One (1) Coat Maxbond Surface Conditioner- White -or- One (1) Coat Dura Crete Acrylic Masonry Primer Apply Maxflex Elastomeric Patching Compound- as needed One (1) Coat Dura Crete Exterior 100% Acrylic Texture- Coarse
