

Save Time. Be More Productive.

Slash your raceway installation time with Wiremold Prewired Raceway. Convenient and organized, this product allows you to finish a nine or more hour raceway project in just three hours. Here you see 20 ft. of V4000 Raceway being installed in an "L" pattern 13 ft. on one wall and 7 ft. on the other, with two circuits and devices 36 in. on center.

Field-wired Raceway

Field wiring this job requires 125 parts and pieces – and lots of material handling.

The electrician has to measure, cut, and install base sections individually.

After inserting dividers, wires are pulled, wire clips added, and receptacles are wired up and installed. After more measuring and cutting, covers are installed.

■ Total elapsed time 9:43
(8:00 AM to 5:43 PM)
It's a long day!

Wiremold Prewired Raceway

Wiremold prewired raceway arrives labeled so all the components are in the right place. There's less material handling and no going back for missing parts.

The electrician simply installs prewired sections. There's no measuring, no cutting, no wire clips, and no wiring up individual receptacles.

After connecting pigtails, precut covers complete a perfect job – in one-third the time.

■ Total elapsed time 3:30
(8:00 AM to 11:30 AM)
It's not even lunchtime!
