

CWP 800 WALL PANEL SYSTEM

Capable of accommodating a variety of geometric shapes, Englert ACM wall panels give architects the opportunity to employ more imaginative and creative designs. They are available in a variety of standard and custom colors, all in a premium Kynar 500[®] PVDF resin-based coating.

Englert's full line of aluminum composite wall panels can be formed to accommodate the simplest and most complex geometry, including curves. The wall panels are designed to meet all applicable ASTM tests, as well as for impact resistance.

ENGLERT CWP 800 WALL PANEL SYSTEM

The **Englert CWP 800** is a high performance composite metal wall panel infill system designed to fully integrate into aluminum window systems. These wall panels can be fabricated to custom sizes and may be used as replacement or accent panels within the window system.
