## Marker Door with Magnetic Dry Erase Panels

### MARKER DOOR SPECIFICATIONS

Provide Marker Door sliding wardrobe doors manufactured by Slimfold Corporation, Dothan, AL in the dimensions shown on the drawings and with the following attributes:

#### ARRANGEMENT

- Sliding doors shall consist of framed prefinished steel panels supported by adjustable bottom rollers and adjustable top guides that travel in a threshold track and top track respectively.
- Top track to be prefinished steel with an integral fascia that matches the stile and rail finish.
- The bottom track shall be prefinished steel to match door frame and shall not exceed 5/16" (8mm) in height for minimum floor obstruction.
- The bottom roller shall be free floating and provide a 1" (25mm) vertical adjustment. Marker Door rollers are factory installed and shall have plain bearing acetal wheels.
- The adjustable top guides shall be permanently fixed to the top connectors and fit snugly into the vertical openings in the top track.

#### FRAME

- The frame shall consist of prefinished roll-formed stiles and rails joined at each corner by positively retained, removable, unhandled, connectors that snap in place and contain preassembled rollers and guides.

#### PANELS

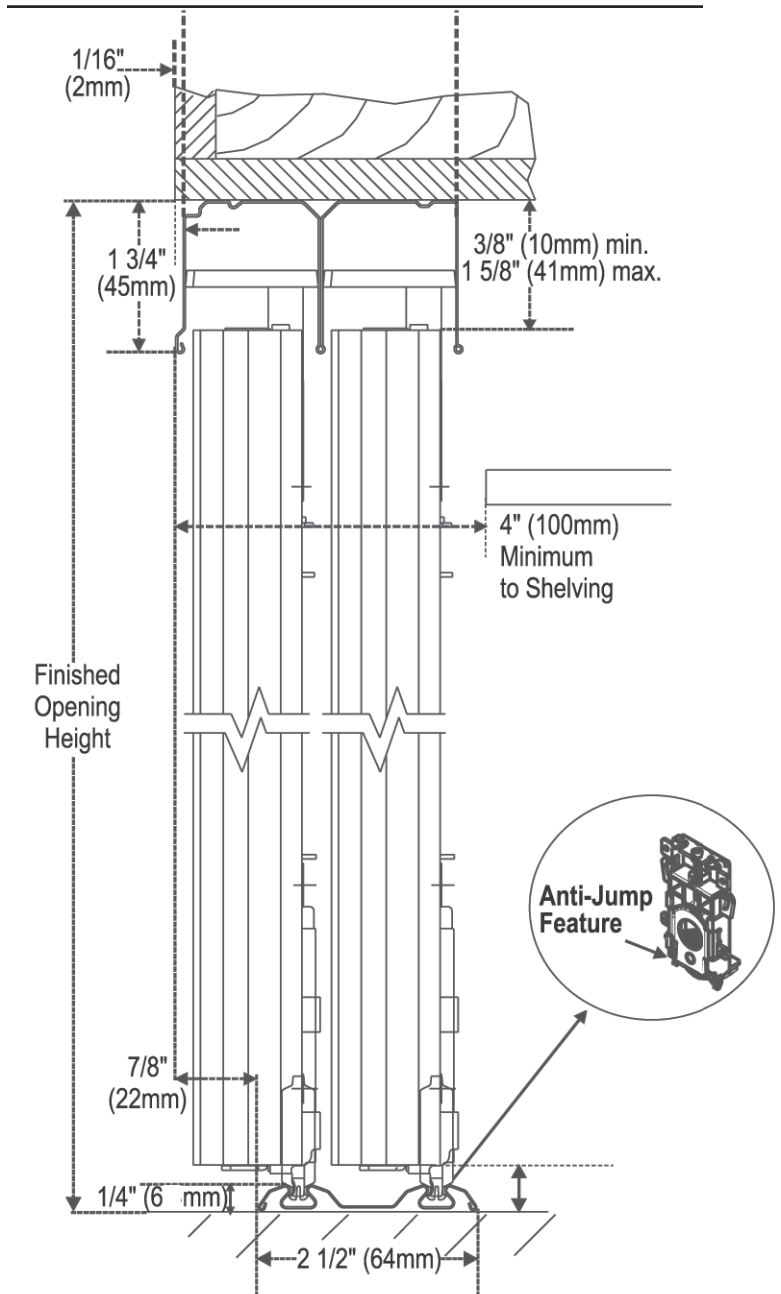

- Dry erase finished, steel panel.

#### FINISHES

Bright White, Vanilla, Architectural Brown, Black, Arctic Silver, Satin Gold, Bright Gold
