COILING SECURITY GRILLES

SG3000 SERIES

Product Description: Coiling Security Grilles SG3000 Series are vertical coiling units comprising of vertical links and horizontal rods. SG3000 Series Security Grilles are available in motor, hand crank, hand chain and push up operated designs. These units can be fabricated in stainless steel and aluminum in a variety of finishes and patterns.

Product Advantages: SG3000 Series Security Grilles are available in eight different grille patterns. By combining grille designs with customized drive mechanisms we are able to reduce head room and side room requirements between thirty and forty percent when compared to conventional coiling security grille designs.

Design Alternatives: Coiling Security Grilles provide a more aesthetically pleasing solution to securing openings than the use of conventional type accordion folding or sliding gates. SG3000 Series Coiling Security Grilles require much less head room and side room than the alternative designs and therefore, provide design professionals a great deal more of flexibility.

Applications: SG3000 Series Coiling Security Grilles are ideal for use in parking facilities, schools, correctional facilities, industrial facilities, as well as shopping malls and store fronts.

SG3000 Security Grille With A Custom Fabricated Curtain of Copper Links & Spacers.

Model SG3000-ACL Utilizes Circular Links For A More Elegant Appearance.

SG3000 Security Grille Designed With Custom Curtain Cut Out To Accommodate For Variations In the Opening.
