International Inc.

Tepromark Vinyl Matting Provides the Perfect Safety and Anti-Fatigue Flooring

- Reduces Noise
- Eliminates Slippery Surfaces
- Promotes Comfort
- Helps Prevent Accidents

CLOSE SPACED, OPEN GRID

CLOSE GRIP, a closely spaced, double grid safety matting, 5/8" thick, that is ideal for high volume pedestrian areas.

- Closely spaced grid makes it usable in areas where women's high heels could easily be trapped.
- Liquids, dirt and grime simply pass through the open grid.
- Hard wearing, impervious to chemicals.
- Available in rolls, so pick up for cleaning is easy.
- Rolls are 33 feet long, 2, 3 or 4 feet wide.

ENTRYTRED 'Heelproof' entrance mat, 9/16" thick. A self-draining open grid design that is easy to install and keep clean.

- Similar to Closegrip, but is stiffer and harder.
- Cleaner entrances - 'Diamond Tread' slip resistant surface literally scrapes the dirt off shoes.
- Simple cleaning, as it is non-porous, therefore does not absorb.
- Long lasting attractive alternate to conventional 'multi-piece' entrance mats - at a fraction of the cost.
- Rolls are 33 feet long, 2 or 3 feet wide.

AIR CUSHION – TUBULAR MATTING

CUSHIONMAT, cushioned, lightweight and hygienic matting 5/16" thick, to cover working surfaces with over 2000 sealed-in-air cushions per square yard.

- An ideal working surface that is noise free and protects delicate materials and instruments when placed on the work bench.
- Use in grocery and supermarket food storage bins where delicate fruits and vegetables are placed on display.
- Effectively drains liquids and is easily cleaned.

HOLLOWGRIP, flexible PVC tubes electronically welded together in 1/4" thick grid form with an embossed nonslip surface.

- An anti-vibration matting for under office equipment.
- Use for less demanding wet/dry areas than for other open grid design Tepromark matting.
- Provides cushioned comfort and contours itself to uneven floors.
- One piece, lightweight format makes it easy to roll up for cleaning.

INTERLOCKING TILES

GRIDLOCK one foot squares snap together to form any size of continuous mat. Effective matting at cost effective prices.

- Exclusive 2-part Snaplock system.
- Engineered for health clubs, pools, etc. to make Gridlock the most comfortable tile mat available.
- Provides a cushion for delicate equipment.

SELF-DRAINING, OPEN GRID MATTING

TREADS CUT INTO MATTING WITH A DIAMOND WHEEL FOR SUPERIOR ANTI-SLIP PROTECTION

TEPROHOLD, 5/8" thick heavy duty industrial mat where durability is important.

- Superior anti-slip properties, even on slick oily floors, because of its 'diamond-cut' tread.
- Vynagrip won't shift around. Cross ribs with 'diamond cut' tread on the reverse side of the mat provide positive traction.
- Provides Tepromark's best fatigue reducing cushion for personnel who must stand for long periods of time.

TUFFGRID heavyweight of the self-draining, 'diamond cut' tread floor mats is 3/4" thick.

- For use in garages, factories or stables. Sturdy enough to be able to support automobiles, heavy duty trucks or horses.

TEPROSTAT, a specially engineered 3/8" thick anti-static mat.

- Effective where static electricity is a problem, as in computer rooms.
- Voltage charges rush to the ground when Tepromark's unique grounding tape is used.
- Comfortable to walk on and helps relieve foot fatigue.

THE GRIPPER is a low cost alternate to Tepromark's other open double-grid designs. Identical to Vynagrip, except is 3/8" thick.

- Excellent for marine service.
- Water and other liquids run through the self-draining open grid design.
- Sun resistant. Direct sunlight will not soften the mat and make it flow.

ROOFTRED loose lay, maintenance free system, 9/16" thick for roof walkways.

- Excellent drainage is achieved because the lower bars of the open grid design run parallel with the walkway.
- Light gray color reflects the sunlight and reduces heat absorption.

WET / DRY SURFACE MATTING

TEPROFLOW has been specially engineered to drain in all directions. Lower underbars are channeled to allow water to drain away from matting. "4 way drainage". No water buildup.

- Ideal for barefoot applications. Full support and easy on the feet. Embossed wave pattern makes it comfortable under foot.
- Fungus and bacteria inhibitor - Sanitized anti-bacterial additive.
- Sure-footed extra grip underfoot.
- Self-draining open-grid design allows for quick cleaning with a hose.
- Teproflow is ideal for pool areas, showers, saunas, boats, marinas and health spas.

VINYL DUCKBOARD offers the same sturdy construction as other open grid mats, but with a smooth, rather than a tire-tread surface.

- Comfortable cushion that is easy on bare feet.
- Used as a shock absorbing surface for machines when placed on floors or work benches.
- Protects valuable and delicate tools that are inadvertently dropped.

MATTING SPECIFICATIONS

All matting on pages 2 and 3, except Gridlock and Tuffgrid, come in 33 foot rolls, but can be custom cut to smaller sizes.

Gridlock is supplied as one foot square tiles. Tuffgrid is supplied in pieces 24" wide and 16.6 feet long.

Aluminum and PVC edging and PVC clips to hold together pieces end to end and from side to side are available for most styles.

A number of colors for each style is available.

Contact our office at 1-800-645-2622 for additional information.

TEPRO MATS — Solid Vinyl Matting and Flooring

The ADDED VALUE Matting and Flooring

- **TEPRO MATS** are supplied in rolls, whereas most other solid mat products come in tile form. The long lengths of each roll make installation easy and able to cover large areas in one jointless piece.
- **TEPRO MATS** are 100% PVC, resistant to oils, grease and acids.
- Hygienic and easy to clean, **TEPRO MATS** are hard wearing and scuff resistant.

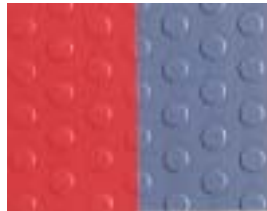

FLOORING – Rolls are 38" wide. Standard roll lengths are 82 feet, while Heavy Duty lengths are 65 feet.

TEPRO SPOT An attractive PVC alternative to traditional stud flooring products. The high density 1/4" diameter dot pattern gives extra grip. Standard is 1/16" thick and Heavy Duty is 7/64" thick.

Available in Red and Blue.

TEPRO COIN A design 'tried and tested' in industry. Pattern is made up of 7/8" diameter disks. Standard is 1/16" thick and Heavy Duty is 7/64" thick.

Available in Blue and Green.

TEPRO SPOT ECONOMY

The lower cost, 100% recycled PVC version of **TEPRO SPOT**.
Available in Dark Gray and Black.

TEPRO COIN ECONOMY

The lower cost, 100% recycled PVC version of **TEPRO COIN**.
Available in Dark Gray and Black.

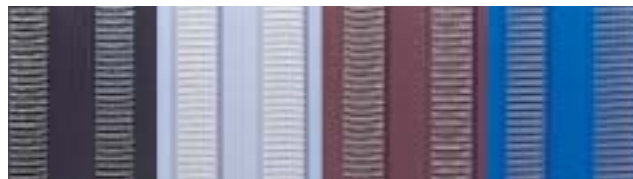

MATTING

TEPRO STUD A heavy duty 9/64" thick, stud pattern surface with a depth of profile sufficient to accommodate occasional spillage. Rolls are 38" wide and 65.5 feet long.

Available in Dark Gray, Black and Blue.

TEPRO TRED A tough 5/32" thick, hard wearing ribbed surface suitable for industrial and heavy duty areas, walkways and corridors. Rolls are 39" wide and 33 feet long.

Available in Blue, Grey, Black and Brown.
