

*Synthetic Sports Floors
and the Environment*

Robbins. Still the Leader.

Robbins — Commitment to Environmental Stewardship

At Robbins, leadership in product design doesn't just apply to athletic performance and product quality—it also extends to our commitment to using natural resources wisely and improving indoor air quality during installation. Our state-of-the-art manufacturing technologies maximize the use of raw materials while reducing the impact on the environment. This reflects the foundation of our product development —increasing product quality and performance while decreasing raw materials usage. We actively participate in organizations like the United States Green Building Council, who support sustainable development and reforestation efforts.

Indoor Air Quality Pulastic system components, especially when coupled with the new water dispersed topcoat are virtually odor free and meet LEED requirements for low emitting materials—adhesives, sealants, resins and game line paint.

Maximizing Use of Natural Resources Pulastic systems contain 40%-65% post-industrial, or 60%-85% post-consumer recycled content by volume depending on system configuration. On average, it's estimated that the scrap from as many as 1,000 tires go into every installation!

To learn more about how Robbins can help you obtain LEED credits on your project, please contact your Robbins Regional Manager. They can provide you with information detailing the actual value that a Robbins system contributes to your project:

- **Construction Waste Management** — MR Credit 2.1 & 2.2
- **Resource Reuse** — MR Credit 3.1 and 3.2
- **Low Emitting Materials** — EQ Credits 4.1 and 4.4
- **Certified Wood** — MR Credit 7
- **Recycled Content** — MR Credit 4.1 and 4.2
- **Regional Materials** — MR Credit 5.1 and 5.2
- **Innovation and Design Process** — ID Credit 1

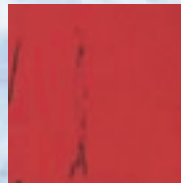

ROBBINS ADDS TO ITS INDUSTRY-LEADING PORTFOLIO OF SYNTHETIC SPORTS FLOORING SYSTEMS:

Chem-Turf®/Strata-Sport Plus™

We continually strive to advance the science behind sports surfacing technology. We've built on our more than 20 years of experience in the design and manufacturing of polyurethane sports surfaces, updated the Chem-Turf system, and created the all-new Strata-Sport Plus to strengthen our top-tier lineup of padded polyurethane surfaces.

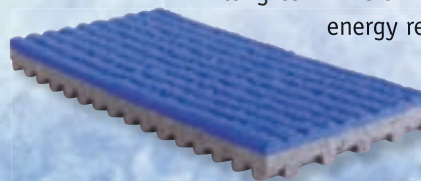

The All-New Galaxy™ Family

Introducing our Galaxy line, a full array of rubber floor options for various applications ranging from gyms and ice arenas to locker rooms and commercial settings. There is a quality flooring option for every need and every budget within this exciting new lineup.

Durathon® Elite Track & Durathon® Elite Infield

Rounding out our family of competition/jogging/walking track products, Durathon Elite Track and Infield are rubber sheet good systems suitable for competition and practice facilities. Provides excellent force reduction to protect athletes from long-term micro-injuries, while providing superior energy restitution to deliver outstanding athletic performance. Its durable vulcanized surface provides excellent performance characteristics for spike and non-spike use.
