Prima Series Hinge

Prima Hinges provide extra application possibilities. Their Top and Bottom Pivot style handles the weight of the door better than traditional "Side Mount" hinges, as well as allowing greater glass exposure, thus making for a more aesthetic enclosure. Prima Hinges can be mounted floor and ceiling, floor and wall, floor and fixed transom, floor and adjacent panel, or floor and header for enclosures not reaching the ceiling.

Vienna Series Hinge

Cologne Series Hinge

The Vienna and Cologne Series Hinges are identical internally, only distinguished by their differing plate styles. The ideal hinges for wider and heavier doors, two hinges can accommodate up to a 36" wide door weighing up to 110 pounds, while three hinges can accommodate up to a 36" wide door up to 140 pounds. Two strategically placed steel pins allow the hinge to be used in a "mouse-ear" shaped cut-out, thus providing a non-slip safety feature. For those customers wishing to do a rectangular style cut-out, the two steel pins may be removed, allowing more adjustability.
